SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments is clearly understood, and the impact of information collection requirements on respondents can be properly assessed. The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

II. Proposed Actions

This provision requires employers to post a sign warning against the use of mobile radio transmitters on all roads within 1000 feet of blasting operations. When this requirement creates an "operational handicap," the employer must develop and implement an alternative method that will prevent the premature detonation of electric blasting caps. The alternative method must be in writing, and a competent person must certify its adequacy.

OSHA will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB to extend the approval of the information collection requirements contained in the Construction Records for Blasting Operations.

Type of Review: Extension of currently approved information collection requirements.
