Title: National Survey of Drinking and Driving Attitudes and Behavior: 1999.

OMB Number: 2127-NEW.

Type of Request: New information collection.

Abstract: NHTSA proposes to conduct a survey by telephone among some nationally representative samples of 5,700 adults, including older adults. Participation by respondents would be voluntary. The findings from this proposed collection will assist NHTSA in addressing the problem of alcohol-impaired driving and formulating programs and recommendations to Congress. NHTSA will use the findings to help focus current programs and activities to achieve the greatest benefit, to develop new programs to decrease the likelihood of drinking and driving behaviors, and to provide informational support to states, localities, and law enforcement agencies that will aid them in their efforts to reduce drinking and driving crashes and injuries.

In conducting the proposed survey, the interviewers would use computer-aided telephone interviewing (CATI) to reduce interview length and minimize recording errors. A Spanish-language translation and bilingual interviewers are proposed to minimize language barriers to participation. The proposed survey would be anonymous and confidential.

Affected Public: Randomly selected members of the general public aged sixteen and older in telephone households.

Estimated Total Annual Burden: 1710.

ADDRESSES: Send comments, within 30 days, to the Office of Information and
