

considerable recreational use in limited accessible locations. Public health and safety, sanitation and the pollution of water resources are also of concern.

Public comments following initial publication of these supplementary rules strongly recommended the addition of supplementary rules prohibiting the discharge of firearms for purposes other than the lawful taking of game on the above defined public land. Equestrians, bicycle riders, persons involved in recreational fishing and hiking, and adjacent property owners all requested this change.

Nothing herein is intended to in any way restrict or prevent access to or use of private property within the designated area. Public officers or employees in the performance of their official duties are exempt from these supplementary regulations. These supplementary regulations are not intended to and will not be enforced to hinder or curtail any valid existing right, permit, or authorization. Access and use by owners or legitimate occupants or adjacent private property is permitted at all times. With the exception of supplementary rule E in the above list, these supplementary rules do not apply to individuals involved in the lawful taking of game. These supplementary rules are in conformance with the May 1997 Caliente Resource Management Plan.

National Park Service

Change in Noise Evaluation Methodology for Air Tour Operations Over Grand Canyon National Park

AGENCY: National Park Service, Interior.

ACTION: Notice of Disposition of Public Comments and Adoption of Final Noise.

Evaluation Methodology for Air Tour Operations Over Grand Canyon National Park

SUMMARY: On January 26, 1999, the National Park Service (NPS) published a Public Notice of agency policy in the **Federal Register** with the above title (64 FR 3969-3972), requesting comments on refinements to NPS' noise evaluation (i.e., impact assessment) methodology for air tour operations over Grand Canyon National Park (GCNP). Specifically, the refinements contemplated a two-zone system for assessing impacts related to substantial restoration of natural quiet at GCNP. In Zone One, which would encompass about one-third of the Park's area, the threshold of noticeability previously used in noise modeling for environmental analyses related to GCNP air tours would continue to be used (i.e., the average A-weighted natural ambient level plus 3 decibels). In Zone Two, which would encompass about two-thirds of the Park's area, the threshold for the onset of impact would be audibility (i.e., the level at which aircraft can begin to be heard by people with normal hearing, determined to be 8 decibels below the average A-weighted natural ambient level at GCNP).

The NPS received 19 comments in response to the Public Notice. Comments were received from industry associations (e.g., United States Air Tour Association, Helicopter Association International, National Air Transportation Association); environmental groups (e.g., Sierra Club, Grand Canyon Trust, Friends of Grand Canyon); air tour operators; representatives of tribal concerns; and the general public. The NPS considered all substantive comments.

DATES: The noise impact assessment methodology presented herein is effective immediately.
