BILLING CODE 4160-15-P

DEPARTMENT OF THE INTERIOR

Notice of Intent To Negotiate an Agreement Between the Central Utah Water Conservancy District and Department of the Interior for Construction of the Alpine Aqueduct Reach 3 Raw Water Bypass Pipeline, Utah County, UT

AGENCY: Office of the Assistant Secretary—Water and Science, Department of the Interior.

ACTION: Notice of intent to negotiate an agreement between the Central Utah Water Conservancy District (CUWCD) and Department of the Interior (Interior) for construction of the Alpine Aqueduct Reach 3 Raw Water Bypass Pipeline, Utah County, Utah.

SUMMARY: Under repayment contract No. 14-06-400-4286, dated December 28, 1965, as amended and supplemented, the United States and CUWCD agreed to the terms and conditions for the delivery of project water from the Bonneville Unit of the Central Utah Project. The project purposes for the Bonneville Unit include but are not limited to, irrigation, municipal and industrial, water conservation, water efficiency improvements, fish and wildlife, and recreation. As part of the Bonneville Unit, the Alpine Aqueduct System was

constructed to convey Project municipal and industrial water to North Utah County. CUWCD is under contract for the operation and maintenance of Alpine Aqueduct System. Since treated Project water is not yet available for delivery through the Alpine Aqueduct, CUWCD intends to use Alpine Aqueduct Reach 3 to deliver untreated raw water. To deliver the raw water, a pipeline must be constructed to bypass the Utah Valley Water Purification Plant. This bypass pipeline, will be approximately 2,030 feet in length, up to 60 inches in diameter, and will connect Alpine Aqueduct Reach 1 to Alpine Aqueduct Reach 3, which will enable the delivery of the untreated municipal and industrial water to the North Utah County communities.

When construction of the bypass pipeline is completed it will become a CUP Project feature and title will be in the name of the United States. National Environmental Policy Act compliance will be completed by Interior.

DATES: Dates for public negotiation sessions will be announced in local newspapers.

FOR FURTHER INFORMATION CONTACT: Additional information on matters related to this **Federal Register** notice can be obtained at the address and telephone number set forth below: Mr. Michael Hansen, Program Coordinator, CUP Completion Act Office, Department of the Interior, 302 East 1860 South, Provo UT 84606-6154, Telephone: (801) 379-1194, Internet: mhansen@uc.usbr.gov

Dated: July 14, 1999.

Ronald Johnston,

CUP Program Director, Department of the Interior.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY-080-1610-00]

Notice of Availability of the Proposed Resource Management Plan and Final Environmental Impact Statement for the Newcastle Field Office Administrative Area, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Proposed Newcastle Resource Management Plan (RMP) and Final Environmental Impact Statement

(FEIS). The proposed RMP describes the proposed future management direction for approximately 291,168 acres of BLM-administered public land surface and 1,407,698 acres of BLM-administered Federal mineral estate in the Wyoming portion of the Newcastle Field Office administrative area.

If you are interested in being involved in future activity planning and implementation of management decisions addressed in the proposed RMP, please contact the Newcastle Field Office at the address below.

The Proposed Newcastle Resource Management Plan and FEIS document is a complete reprinting of the material presented in the draft EIS document. It contains updated and revised chapter narratives, maps, tables, and appendices. Therefore, it should not be necessary to refer to the draft EIS in reviewing this proposed RMP and FEIS.

The Proposed Newcastle Resource Management Plan is a comprehensive land use plan for the management of the BLM-administered public lands in the Newcastle Field Office administrative area. The proposed RMP is a refinement of the preferred alternative presented in the draft EIS. Comments from the public, review and corrections by BLM staff, and new information developed since the distribution of the draft EIS have prompted some changes in the Preferred Alternative. The environmental effects of the proposed RMP are not substantively different from those of the Preferred Alternative. The proposed RMP focuses on the resolution of key resource management issues that were identified with public involvement early in the planning process. These issues include: (1) split estate land management; (2) special management area designations; and (3) resource accessibility and manageability.

The draft EIS for the Newcastle RMP was made available for public review and comment in April 1998. Comments received on the draft EIS were considered in preparing the Proposed Newcastle RMP and FEIS.

The following are changes made to the draft EIS in preparing the FEIS as a result of the public comments received, correcting errors, and updating information.

—Three planning criteria have been added: biological diversity, leasable minerals potential, and wild and scenic rivers. None of these additional criteria caused any changes in the Preferred Alternative.

—The “Socioeconomic” section in Chapter 3 has been updated and revised using current data.
