Proposed Approval and Promulgation of California State Implementation Plan for San Joaquin Valley Unified Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP). These rules were submitted by the State on behalf of the District to provide general permitting requirements and general provisions for the implementation of NSR and other SIP requirements for stationary sources in the District. The rules were also submitted to improve the consistency and clarity of the existing SIP.

The intended effect of proposing approval of these rules is to control air pollution in accordance with the requirements of the Act and improve the consistency and clarity of the existing SIP. In the Final Rules section of this **Federal Register**, the EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for this approval is set forth in the direct final rule. If no adverse comments are received, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period. Any

parties interested in commenting should do so at this time.

DATES: Comments on this proposed action must be received in writing by August 23, 1999.
