k. *Description of Proposal.* The applicant proposes modifications in both the Seymour Lake and Echo Lake Dams in order to utilize the spillways to help regulate lake levels. The applicant would lower spillway crests at both dams to facilitate run-of-river operations and to leave existing gates open one inch to provide continuous river flow. Provisions for the installation of flashboards on the lowered spillways have been made allowing the dams to be operated under the current mode of operation, if desired. At the Seymour Dam, the existing timber crib with concrete cap would be replaced with a new concrete gravity type structure. To compensate for the lost gate, the discharge capacity at Seymour Dam the Spillway length would be increased to include the area of the existing abutment wall.
