## FEDERAL EMERGENCY MANAGEMENT AGENCY

### Guidance for Developing State, Tribal, and Local Radiological Emergency Response Planning and Preparedness for Transportation Accidents

**AGENCY:** Federal Emergency  
Management Agency.

**ACTION:** Notice of availability.

**SUMMARY:** FEMA announces the availability of the document "Guidance for Developing State, Tribal, and Local Radiological Emergency Response Planning and Preparedness for Transportation Accidents, FEMA-REP-5, Revision 2," and requests comments.

**DATES:** Comments and responses should be sent no later than November 3, 1999.

**ADDRESSES:** Comments on "FEMA-REP-5, Rev. 2" should be sent to the Rules Docket Clerk, Office of the General Counsel, room 840, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (facsimile) (202) 646-4536.

**FOR FURTHER INFORMATION CONTACT:** William F. McNutt, Senior Policy Advisor, Chemical and Radiological Preparedness Division, Preparedness, Training, and Exercises Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-2857, (facsimile) (202) 646-3508.

**SUPPLEMENTARY INFORMATION:** FEMA-REP-5 was prepared by the Transportation Accidents Subcommittee of the Federal Radiological Preparedness Coordinating Committee. It represents the efforts of several federal agencies, state organizations, and a Native American organization. The intended use of FEMA-REP-5 is to provide guidance to State, Tribal and local government officials who must prepare or revise emergency response plans for transportation accidents involving radioactive materials.

Although use of the guidance is not mandatory, it is recommended for use to develop a hazard specific plan, as part of an all-hazards emergency response plan, at all levels of government.

Published first in March 1983, this guidance document was revised and published in June 1992 as Revision 1. The current revision is intended to supersede all previous issues. When the

defined objectives are applied, planning will include all aspects of preparedness from pre-accident coordination and assignment of responsibilities, to post-accident operations, cleanup, and site restoration. The State, Tribal or local government office that adheres to the expressed concepts and recommendations found in FEMA-REP-5, Rev. 2, will be able to prepare an emergency operations plan that satisfies the need to protect both workers and citizens while safely responding to a radioactive materials transportation accident. The plan can be appended to the overall emergency operations plan for the jurisdiction.

Our goal is to provide guidance by means of a useful document that enables officials at all levels of government to plan for possible hazardous accidents. We welcome your comments on this document. All comments will be considered.

Dated: July 30, 1999.

**Agency Forms Undergoing Paperwork Reduction Act Review**

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

**Proposed Projects**

1. Application for Training for the CDC Distance Learning Program, Laboratory Training, and Other Training—(0920-0017)—Reinstatement—The Public Health Practice Program Office (PHPPO) is requesting an emergency clearance to resume data collection for the training forms associated with this clearance. We also plan on modifying/revising segments of the application forms. PHPPO in conjunction with the Public Health Training Network (PHTN) and the National Laboratory Training Network (NLTN) at CDC includes the Distance Learning Program which offers self-study, computer-based training, satellite broadcast, video courses, instructor-led field courses, and lab courses related to public health professionals worldwide. Employees of hospitals, universities, medical centers,

laboratories, state and federal agencies, and state and local health departments apply for training in an effort to learn up-to-date public health procedures. The "Application for Training" forms are the official applications used for all training activities conducted by the CDC.

The Continuing Education (CE) Program, which includes CDCs accreditation to provide Continuing Medical Education (CME), Continuing Nurse Education (CNE) and Continuing Education Unit (CEU) for almost all training activities, requires a unique identifying number, preferably the respondent's Social Security Number (SSN), to positively identify and track individuals who have been awarded CE credit. It is often necessary to identify individuals currently enrolled in courses, or to retrieve historical information as to when a particular individual completed a course or several courses over a time period. This information provides the basis for producing a requested transcript or determining if a person is enrolled in more than one course. The use of the SSN is the only positive way of assigning a unique number to a unique individual for this purpose. However, the use of the SSN is voluntary; if a student chooses not to submit a SSN, CDC assigns a unique identifier. The reason the SSN, rather than an arbitrary assigned number is preferred, is because students are not likely to remember an arbitrary number. A student's participation in the curriculum of self-study courses sometimes spans a number of years. The SSN is necessary for eliminating duplicate enrollments; for properly crediting students with completed course work who have similar names or have changed addresses; for generating transcripts of previous completed course work on a cumulative basis. Due to the volume of enrollments, CDC Form 36.5 has been previously approved and used for years as an optical mark scan form. Use of this form, along with the use of the Social Security Number, greatly enhances CDC's capability to process a much greater volume of enrollments in less time with much greater accuracy. The total burden hours are 8,025.
