BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-289]

GPU Nuclear Inc.; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted a request by GPU Nuclear, Inc. (the licensee) to partially withdraw its February 7, 1997, application for an amendment, as supplemented October 24, 1998, to Facility Operating License No. DPR-50, issued to the licensee for operation of the Three Mile Island Nuclear Station, Unit 1, located in Dauphin County Pennsylvania. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on March 25, 1998, (63 FR 14486).

The purpose of the licensee's amendment request was to revise the Technical Specifications (TS) to incorporate certain improvements from the Revised Standard Technical Specifications for Babcock and Wilcox Plants, NUREG-1430, identify changes to plant systems and revisions to system descriptions not involving limiting conditions for operation, and make various editorial or typographical corrections.

Subsequently, the licensee informed the staff that the changes related to the hydrogen recombiner system on proposed TS page 4-38 in the amendment request were no longer required. Thus, that portion of the

amendment application is considered to be partially withdrawn by the licensee.

For further details with respect to this action, see the application for amendment dated February 7, 1997, as supplemented October 24, 1998. The licensee's letter dated October 24, 1999, also partially withdrew the application for amendment.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the Law/Government Publications Section, State Library of Pennsylvania, (REGIONAL DEPOSITORY) Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, PA 17105.

Dated at Rockville, MD, this 8th day of July 1999.

For the Nuclear Regulatory Commission,

Timothy G. Colburn,

Senior Project Manager, Section 1, Project Directorate 1, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Notice of a Public Workshop to Discuss the Development of License Termination Plans and Other Guidance to Support the Decommissioning of Nuclear Facilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of workshop.

SUMMARY: This notice announces the schedule and agenda for a Public Workshop to address the issues associated with developing License Termination Plans (LTPs) to support the decommissioning of nuclear power reactors and guidance to support the decommissioning of all nuclear facilities. The purpose of this workshop is to provide a forum for NRC staff, the nuclear industry, other regulatory agencies, and interested stakeholders to discuss the issues that need to be addressed as nuclear power reactor licensees develop LTPs to support the termination of their NRC licenses, as well as the guidance being developed by the NRC to support the decommissioning of all nuclear facilities.

DATES: August 18 and 19, 1999.

ADDRESSES: Two White Flint North, 11545 Rockville Pike, Rockville, MD.

SUPPLEMENTARY INFORMATION: On October 21, 1998, (63 FR 56237) NRC

announced that it was sponsoring a series of public workshops to support NRC staff's development of a Standard Review Plan (SRP) and other guidance for the decommissioning of nuclear facilities. On August 18 and 19, 1999, NRC staff will hold a workshop on the issues associated with the development of LTPs to support the decommissioning of nuclear power reactors and the guidance being developed by the NRC to support the decommissioning of all nuclear facilities. Presentations and discussions on August 18, 1999, will focus on LTPs, and on August 19, 1999, discussions and presentations will focus on decommissioning issues identified by State regulatory agencies and surveys to support decommissioning.

An agenda for the workshop, which was developed by NRC in conjunction with the Nuclear Energy Institute, the States, the Fuel Cycle Facility Forum and other industry stakeholders, has been posted on the NRC's Website at: <http://www.nrc.gov/NMSS/DWM/DECOM/decomm.htm> under the "NRC Standard Review Plan for Decommissioning" heading.

The workshop will be held at the NRC Headquarters Auditorium, at Two White Flint North, 11545 Rockville Pike, Rockville, MD. NRC strongly encourages interested stakeholders to attend and participate in this workshop, as it will offer a unique opportunity to provide NRC staff and the nuclear power industry with insights, perspectives, and information that stakeholders feel is important for the nuclear power industry to consider during the development of LTPs and for NRC to consider as it develops guidance for the decommissioning of licensed facilities.

FOR FURTHER INFORMATION CONTACT: Dominick A. Orlando, Decommissioning Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, at (301) 415-6749; Clayton L. Pittiglio, Decommissioning Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, at (301) 415-6702, or Richard S. Clement, Decommissioning Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, at (301) 415-6625.

Dated at Rockville, Md., this 30th day of July 1999.

For the Nuclear Regulatory Commission,

Larry W. Camper,

Chief, Decommissioning Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.
