§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

99-17-08  Pilatus Aircraft Ltd.: Amendment 39-11256; Docket No. 99-CF-10-AD.

Applicability: Models PC-12 and PC-12/45 airplanes, manufacturer serial numbers (MSN) 101 through 260, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated in the body of this AD, unless already accomplished.

To prevent damage to electrical components if the generator 2 is not switched off prior to engine shutdown and it overheats, which could result in loss of electrical power to certain critical airplane components, accomplish the following:

(a) Within the next 100 hours time-in-service (TIS) after the effective date of this AD, modify the generator 2 excitation by removing certain diodes and installing a new 5-amp circuit breaker and suppression filter. Perform these actions in accordance with the ACCOMPLISHMENT INSTRUCTIONS section of Pilatus Service Bulletin No. 24-012, dated February 19, 1999.

Note 2: The affected airplanes incorporate one of the following generators:

—a BOSCH Generator 2, part number (P/N) 524.32.12.158. This generator is installed on the factory on Pilatus Models PC-12 and PC-12/45 airplanes beginning with MSN 231 and could be installed on airplanes with a MSN in the range of 101 through 230 by incorporating Pilatus Service Bulletin No. 24-010, dated September 28, 1998; or

—an ELECTRO SYSTEMS Generator 2, P/N 978.87.24.121, with Pilatus Service Bulletin No. 24-009 (installation of support bracket and cut-out relay) incorporated. This generator is installed at the factory on Pilatus Models PC-12 and PC-12/45 airplanes with a MSN in the range of 101 through 230. AD 99-06-17, Amendment 39-11256, Docket No. 99-CF-10-AD.

(b) As of the effective date of this AD, no person may install, on any affected airplane, a generator 2 that does not have the modification referenced in paragraph (a) of this AD incorporated.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Small Airplane Directorate, 1201 Walnut, suite 900, Kansas City, Missouri 64106. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Small Airplane Directorate.

(e) Questions or technical information related to Pilatus Service Bulletin No. 24-012, dated February 19, 1999, should be directed to Pilatus Aircraft Ltd., Customer Liaison Manager, CH-6371 Stans, Switzerland; telephone: +41 41 619 63 19; facsimile: +41 41 610 33 51. This service information may be examined at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(f) The modification required by this AD shall be done in accordance with Pilatus Service Bulletin No. 24-012, dated February 19, 1999. This incorporation by reference was approved by the Director of the Federal Register in accordance with 45 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Pilatus Aircraft Ltd., Customer Liaison Manager, CH-6371 Stans, Switzerland.

(g) This amendment becomes effective on October 4, 1999.

(h) Issued in Kansas City, Missouri, on August 5, 1999.

Michael Gallagher,
Manager, Small Airplane Directorate, Aircraft Certification Office.

BILLING CODE 4910-13-P

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 211

[Release No. SAB 99]

Staff Accounting Bulletin No. 99

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: This staff accounting bulletin expresses the views of the staff that exclusive reliance on certain quantitative benchmarks to assess materiality in preparing financial statements and performing audits of those financial statements is inappropriate; misstatements are not material simply because they fall beneath a numerical threshold.

DATES: Effective August 12, 1999.

FOR FURTHER INFORMATION CONTACT: W. Scott Bayless, Associate Chief Accountant, or Robert E. Burns, Chief Counsel, Office of the Chief Accountant (202-942-4400), or David R. Fredrickson, Office of General Counsel (202-942-9000), Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-1103; electronic addresses: BaylessWS@sec.gov; BurnsR@sec.gov; FredricksonD@sec.gov.

SUPPLEMENTARY INFORMATION: The statements in the staff accounting bulletins are not rules or interpretations of the Commission, nor are they published as bearing the Commission’s official approval. They represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

Dated: August 12, 1999.

Margaret H. McFarland,
Deputy Secretary.

PART 211—[AMENDED]

Accordingly, Part 211 of Title 17 of the Code of Federal Regulations is amended by adding Staff Accounting Bulletin No. 99 to the table found in Subpart B

Staff Accounting Bulletin No. 99

The staff hereby adds Section M to Topic 1 of the Staff Accounting Bulletin Series. Section M, entitled “Materiality,” provides guidance in applying materiality thresholds to the preparation of financial statements filed with the Commission and the performance of audits of those financial statements.

Staff Accounting Bulletins

Topic 1: Financial Statements

* * * * *
M. Materiality

1. Assessing Materiality

Facts: During the course of preparing or auditing year-end financial statements, financial management or the registrant's independent auditor becomes aware of misstatements in a registrant's financial statements. When combined, the misstatements result in a 4% overstatement of net income and a $0.02 (4%) overstatement of earnings per share. Because a numerical threshold in the registrant’s consolidated financial statements is misstated by more than 5%, management and the independent auditor conclude that the deviation from generally accepted accounting principles ("GAAP") is immaterial and that the accounting is permissible.1

Question: Each Statement of Financial Accounting Standards adopted by the Financial Accounting Standards Board ("FASB") states, "The provisions of this Statement shall be applied to immaterial items." In the staff’s view, may a registrant or the auditor of its financial statements assume the immateriality of items that fall below a percentage threshold set by management or the auditor to determine whether amounts and items are material to the financial statements?

Interpretive Response: No. The staff is aware that certain registrants, over time, have developed quantitative thresholds as "rules of thumb" to assist in the preparation of their financial statements, and that auditors also have used these thresholds in their evaluation of whether items might be considered material to users of a registrant's financial statements. One rule of thumb in particular suggests that the misstatement or omission 2 of an item that falls under a 5% threshold is not material in the absence of particularly egregious circumstances, such as self-dealing or misappropriation by senior management. The staff reminds registrants and the auditors of their financial statements that exclusive reliance on this or any percentage or numerical threshold has no basis in the accounting literature or the law.

The use of a percentage as a numerical threshold, such as 5%, may provide the basis for a preliminary assumption that—without considering all relevant circumstances—a deviation of less than the specified percentage with respect to a particular item on the registrant's financial statements is unlikely to be material. The staff has no objection to such a "rule of thumb" as an initial step in assessing materiality. But quantifying, in percentage terms, the magnitude of a misstatement is only the beginning of an analysis of materiality; it cannot appropriately be used as a substitute for a full analysis of all relevant considerations.

Materiality concerns the significance of an item to users of a registrant’s financial statements. An item is "material" if there is a substantial likelihood that a reasonable person would consider it important. In its Statement of Financial Accounting Concepts No. 2, the FASB stated the essence of the concept of materiality as follows:

The omission or misstatement of an item in a financial report is material if, in the light of surrounding circumstances, the magnitude of the item is such that it is probable that the judgment of a reasonable person relying upon the report would have been changed or influenced by the inclusion or correction of the item.3

This formulation in the accounting literature is in substance identical to the formulation used by the courts in interpreting the federal securities laws. The Supreme Court has held that a fact is material if there is—

a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the "total mix" of information made available.4

Under the governing principles, an assessment of materiality requires that one views the facts in the context of the "surrounding circumstances," as the accounting literature puts it, or the "total mix" of information, in the words of the Supreme Court. In the context of a misstatement of a financial statement item, while the "total mix" includes the size in numerical or percentage terms of the misstatement, it also includes the factual context in which the user of financial statements would view the financial statement item. The shorthand in the accounting and auditing literature for this analysis is that financial management and the auditor must consider both "quantitative" and "qualitative" factors in assessing an item's materiality.5 Court decisions, Commission rules and enforcement actions, and accounting and auditing literature6 have all considered "qualitative" factors in various contexts. The FASB has long emphasized that materiality cannot be reduced to a numerical formula. In its Concepts Statement No. 2, the FASB noted that some had urged it to promulgate quantitative materiality guidelines for use in a variety of situations. The FASB rejected such an approach as representing only a "minority view," stating—

The predominant view is that materiality judgments can properly be made only by those who have all the facts. The Board's present position is that no general standards of materiality could be formulated to take into account all the considerations that enter into an experienced human judgment.7

The FASB noted that, in certain limited circumstances, the Commission and other authoritative bodies had issued quantitative materiality guidelines, citing as guidelines ranging from one to ten percent with

---

1. American Institute of Certified Public Accountants ("AICPA"). Codification of Statements on Auditing Standards ("AU") § 312, "Audit Risk and Materiality in Conducting an Audit," states that the auditor should consider audit risk and materiality both in (a) planning and setting the scope for the audit and (b) evaluating whether the financial statements taken as a whole are fairly presented in all material respects in conformity with generally accepted accounting principles. The FASB noted in its Concepts Statement No. 2, the FASB noted that "materiality" is to provide guidance to financial management and independent auditors with respect to the evaluation of the materiality of misstatements that are identified in the audit process or preparation of the financial statements (i.e., (b) above). This SAB is not intended to provide guidance for assessing "materiality" in other contexts, such as evaluations of auditor independence, as other factors may apply. There may be other rules that address financial presentation. See, e.g., Rule 2-04, 17 CFR 270.2-04, under the Investment Company Act of 1940.

2. As used in this SAB, "misstatement" or "omission" refers to a financial statement assertion that would not be in conformity with GAAP.

---

5. See, e.g., Concepts Statement No. 2, ¶¶ 123–124; AU § 312.10 ("materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations."); AU § 312.34 ("Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material."). As used in the accounting literature and in this SAB, "qualitative" materiality refers to the surrounding circumstances that inform an investor's evaluation of financial statement entries. Whether events may be material to Investors for non-financial reasons is a matter not addressed by this SAB.

respect to a variety of disclosures. And, it took account of contradictory studies, one showing a lack of uniformity among auditors on materiality judgments, and another suggesting widespread use of a “rule of thumb” of five to ten percent of net income. The FASB also sought input from practitioners and considered whether a materiality judgment could be based solely on anticipation of market reaction to accounting information.

The FASB rejected a formulaic approach to discharging “the onerous duty of making materiality decisions.” In favor of an approach that takes into account all the relevant considerations, it made clear that:

- Whether the misstatement hides a failure to meet analysts’ consensus expectations for the enterprise.
- Whether the misstatement changes a loss into income or vice versa.
- Whether the misstatement concerns a segment or other portion of the registrant’s business that has been identified as playing a significant role in the registrant’s operations or profitability.
- Whether the misstatement affects the registrant’s compliance with regulatory requirements.
- Whether the misstatement affects the registrant’s compliance with loan covenants or other contractual requirements.
- Whether the misstatement has the effect of increasing management’s compensation—for example, by satisfying requirements for the award of bonuses or other forms of incentive compensation.
- Whether the misstatement involves concealment of an unlawful transaction.

This is an exhaustive list of the circumstances that may affect the materiality of a quantitatively small misstatement. Among other factors, the demonstrated volatility of the price of a registrant’s securities in response to certain types of disclosures may provide guidance as to whether investors regard quantitatively small misstatements as material. Consideration of potential market reaction to disclosure of a misstatement is by itself “too blunt an instrument to be depended on” in considering whether a fact is material. When, however, management or the independent auditor expects (based, for example, on a pattern of market performance) that a known misstatement may result in a significant positive or negative market reaction, that expected reaction should be taken into account when considering whether a misstatement is material.

For the reasons noted above, the staff believes that a registrant and the auditors of its financial statements should not assume that even small intentional misstatements in financial statements, for example those pursuant to actions to “manage” earnings, are immaterial. While the intent of management does not render a misstatement material, it may provide significant evidence of materiality. The evidence may be particularly compelling where management has intentionally misstated items in the financial statements to “manage” reported earnings. In that instance, it presumably has done so believing that the resulting amounts and trends would be significant to users of the registrant’s financial statements. The staff believes that investors generally would regard as significant a management practice to over- or under-state earnings up to an amount just short of a percentage threshold in order to “manage” earnings. Investors presumably also would regard as significant an accounting practice that, in essence, rendered all earnings figures subject to a management-directed margin of misstatement.

The materiality of a misstatement may turn on where it appears in the financial statements. For example, a misstatement may involve a segment of the registrant’s operations. In that instance, in assessing materiality of a misstatement to the financial statements taken as a whole, registrants and their auditors should consider not only the size of the misstatement but also the significance of the segment information to the financial statements taken as a whole. “A misstatement of the revenue and operating profit of a relatively small segment that is represented by management to be important to the future profitability of the entity” is more likely to be material to investors than a misstatement in a segment that management has not identified as especially important. In assessing the materiality of misstatements in segment information—as with materiality generally—situations may arise in practice where the auditor will conclude that a matter relating to segment information is qualitatively material even though, in his or her judgment, it is quantitatively immaterial to the financial statements taken as a whole. This assessment may occur not only at year-end, but also during the preparation of each quarterly or interim financial statement. See, e.g., in the Matter of Venator Group, Inc., AAER 1049 (June 29, 1998).

The FASB also considered whether a materiality judgment could be based solely on anticipation of market reaction to accounting information. And, it took account of contradictory studies, one showing a lack of uniformity among auditors on materiality judgments, and another suggesting widespread use of a “rule of thumb” of five to ten percent of net income. The FASB also sought input from practitioners and considered whether a materiality judgment could be based solely on anticipation of market reaction to accounting information.

The FASB rejected a formulaic approach to discharging “the onerous duty of making materiality decisions.” In favor of an approach that takes into account all the relevant considerations, it made clear that:

- Whether the misstatement hides a failure to meet analysts’ consensus expectations for the enterprise.

- Whether the misstatement involves concealment of an unlawful transaction.

This is an exhaustive list of the circumstances that may affect the materiality of a quantitatively small misstatement. Among other factors, the demonstrated volatility of the price of a registrant’s securities in response to certain types of disclosures may provide guidance as to whether investors regard quantitatively small misstatements as material. Consideration of potential market reaction to disclosure of a misstatement is by itself “too blunt an instrument to be depended on” in considering whether a fact is material. When, however, management or the independent auditor expects (based, for example, on a pattern of market performance) that a known misstatement may result in a significant positive or negative market reaction, that expected reaction should be taken into account when considering whether a misstatement is material.

For the reasons noted above, the staff believes that a registrant and the auditors of its financial statements should not assume that even small intentional misstatements in financial statements, for example those pursuant to actions to “manage” earnings, are immaterial. While the intent of management does not render a misstatement material, it may provide significant evidence of materiality. The evidence may be particularly compelling where management has intentionally misstated items in the financial statements to “manage” reported earnings. In that instance, it presumably has done so believing that the resulting amounts and trends would be significant to users of the registrant’s financial statements. The staff believes that investors generally would regard as significant a management practice to over- or under-state earnings up to an amount just short of a percentage threshold in order to “manage” earnings. Investors presumably also would regard as significant an accounting practice that, in essence, rendered all earnings figures subject to a management-directed margin of misstatement.

The materiality of a misstatement may turn on where it appears in the financial statements. For example, a misstatement may involve a segment of the registrant’s operations. In that instance, in assessing materiality of a misstatement to the financial statements taken as a whole, registrants and their auditors should consider not only the size of the misstatement but also the significance of the segment information to the financial statements taken as a whole. “A misstatement of the revenue and operating profit of a relatively small segment that is represented by management to be important to the future profitability of the entity” is more likely to be material to investors than a misstatement in a segment that management has not identified as especially important. In assessing the materiality of misstatements in segment information—as with materiality generally—situations may arise in practice where the auditor will conclude that a matter relating to segment information is qualitatively material even though, in his or her judgment, it is quantitatively immaterial to the financial statements taken as a whole.
Aggregating and Netting Misstatements

In determining whether multiple misstatements cause the financial statements to be materially misstated, registrants and the auditors of their financial statements should consider each misstatement separately and the aggregate effect of all misstatements. A registrant and its auditor should evaluate misstatements in light of quantitative and qualitative factors and “consider whether, in relation to individual line items in amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.” This requires consideration of—

- the significance of an item to a particular entity (for example, inventories to a manufacturing company), the pervasiveness of the misstatement (such as whether it affects the presentation of numerous financial statement items), and the effect of the misstatement on the financial statements taken as a whole. . .

Registrants and their auditors should consider whether each misstatement is material, irrespective of its effect when combined with other misstatements. The literature notes that the analysis should consider whether the misstatement of “individual amounts” causes a material misstatement of the financial statements taken as a whole. As with materiality generally, this analysis requires consideration of both quantitative and qualitative factors.

If the misstatement of an individual amount causes the financial statements as a whole to be materially misstated, that effect cannot be eliminated by other misstatements whose effect may be to diminish the impact of the misstatement on other financial statement items. To take an obvious example, if a registrant’s revenues are a material financial statement item and if they are materially overstated, the financial statements taken as a whole will be materially misleading even if the effect on earnings is completely offset by an equivalent overstatement of expenses.

Even though a misstatement of an individual amount may not cause the financial statements taken as a whole to be materially misstated, it may nonetheless, when aggregated with other misstatements, render the financial statements taken as a whole to be materially misleading. Registrants and the auditors of their financial statements accordingly should consider the effect of the misstatement on subtotals or totals. The auditor should aggregate all misstatements that affect each subtotal or total and consider whether the misstatements in the aggregate affect the subtotal or total in a way that causes the registrant’s financial statements taken as a whole to be materially misleading.

The staff believes that, in considering the aggregate effect of multiple misstatements on a subtotal or total, registrants and the auditors of their financial statements should exercise particular care when considering whether to offset (or the appropriateness of offsetting) a misstatement of an estimated amount with a misstatement of an item capable of precise measurement. As noted above, assessments of materiality should never be purely mechanical; given the imprecision inherent in estimates, there is by definition a corresponding imprecision in the aggregation of misstatements involving estimates with those that do not involve an estimate. Registrants and auditors also should consider the effect of misstatements from prior periods on the current financial statements. For example, the auditing literature states,

Matters underlying adjustments proposed by the auditor but not recorded by the entity could potentially cause future financial statements to be materially misstated, even though the auditor has concluded that the adjustments are not material to the current financial statements. This may be particularly the case where immaterial misstatements recur in several years and the cumulative effect becomes material in the current year.

2. Immaterial Misstatements That are Intentional

Facts: A registrant’s management intentionally has made adjustments to various financial statement items in a manner inconsistent with GAAP. In each accounting period in which such actions were taken, none of the individual adjustments is by itself material, nor is the aggregate effect on the financial statements taken as a whole material for the period. The registrant’s earnings “management” has been effected at the direction or acquiescence of management in the belief that any deviations from GAAP have been immaterial and that accordingly the accounting is permissible.

Question: In the staff’s view, may a registrant make intentional immaterial misstatements in its financial statements?

Interpretive Response: No. In certain circumstances, intentional immaterial misstatements are unlawful.

Considerations of the Books and Records Provisions Under the Exchange Act

Even if misstatements are immaterial, registrants must comply with Sections 13(b)(2)–(7) of the Securities Exchange Act of 1934 (the “Exchange Act”). Under these provisions, each registrant with securities registered pursuant to Section 12 of the Exchange Act, or required to file reports pursuant to Section 15(d), must make and keep books, records, and accounts, which, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the registrant and must maintain internal accounting controls that are sufficient to provide reasonable assurances that, among other things, transactions are recorded as necessary to permit the preparation of financial statements in conformity with GAAP. In this context, determinations of what constitutes “reasonable assurance” and “reasonable detail” are based not on a “materiality” analysis but on the level
of detail and degree of assurance that would satisfy prudent officials in the conduct of their own affairs.\textsuperscript{13} Accordingly, failure to record accurately immaterial items, in some instances, may result in violations of the securities laws.

The staff recognizes that there is limited authoritative guidance\textsuperscript{14} regarding the "reasonableness" standard in Section 13(b)(2) of the Exchange Act. A principal statement of the Commission's policy in this area is set forth in an address given in 1981 by then-Chairman Harold M. Williams.\textsuperscript{15} In his address, Chairman Williams noted that, like materiality, "reasonableness" is not an "absolute standard of exactitude for corporate records."\textsuperscript{36} Unlike materiality, however, "reasonableness" is not solely a measure of the significance of a financial statement item to investors. "Reasonableness," in this context, reflects a judgment as to whether an issuer's failure to correct a known misstatement implies the purposes underlying the accounting provisions of Sections 13(b)(2)-(7) of the Exchange Act.\textsuperscript{37}

In assessing whether a misstatement results in a violation of a registrant's obligation to keep books and records that are accurate "in reasonable detail," registrants and their auditors should consider, in addition to the factors discussed above concerning an evaluation of a misstatement's potential materiality, the factors set forth below.

• The significance of the misstatement. Though the staff does not believe that registrants need to make finely calibrated determinations of significance with respect to immaterial items, plainly it is "reasonable" to treat misstatements whose effects are clearly inconsequential differently than more significant ones.
  • How the misstatement arose. It is unlikely that it is ever "reasonable" for registrants to record misstatements or not to correct known misstatements—even immaterial ones—as part of an ongoing effort directed by or known to senior management for the purposes of "managing" earnings. On the other hand, insignificant misstatements that arise from the operation of systems or recurring processes in the normal course of business generally will not cause a registrant's books to be inaccurate "in reasonable detail."\textsuperscript{38} The cost of correcting the misstatement. The books and records provisions of the Exchange Act do not require registrants to make major expenditures to correct small misstatements. Conversely, where there is little cost or delay involved in correcting a misstatement, failing to do so is unlikely to be "reasonable."
  • The clarity of authoritative accounting guidance with respect to the misstatement. Where reasonable minds may differ about the appropriate accounting treatment of a financial statement item, a failure to correct it may not render the registrant's financial statements inaccurate "in reasonable detail."\textsuperscript{13} Because the judgment is not mechanical, the staff will be inclined to continue to defer to judgments that reflect a judgment as to whether an illegal act violates any law, or any rule or regulation having the force of law. This would include the deliberate falsification of books, records or accounts, or of administering accounting controls have the purpose of falsifying books, records or accounts, or of circumventing the accounting controls set forth in the Act. This would include the deliberate falsification of books and records or other conduct calculated to evade the internal accounting controls requirement. Cong. Rec. H2115 (daily ed. April 20, 1988).

From this perspective, a registrant's books and records provisions do not require registrants to make minor expenditures to correct small misstatements. Conversely, where there is little cost or delay involved in correcting a misstatement, failing to do so is unlikely to be "reasonable."

• The clarity of authoritative accounting guidance with respect to the misstatement. Where reasonable minds may differ about the appropriate accounting treatment of a financial statement item, a failure to correct it may not render the registrant's financial statements inaccurate "in reasonable detail."\textsuperscript{38} Because the judgment is not mechanical, the staff will be inclined to continue to defer to judgments that

13 S.U.C. § 78b(7). The books and records provisions of section 13(b) of the Exchange Act were originally passed as part of the Foreign Corrupt Practices Act ("FCPA"). In the conference committee report regarding the 1988 amendments to the FCPA, the committee stated, "the conference committee adopted the prudent man qualification in order to clarify that the current standard does not connot an unrealistic degree of exactitude or precision. The concept of reasonableness of necessity contemplates the weighing of a number of relevant factors, including the costs of compliance." Cong. Rec. H2116 (daily ed. April 20, 1988).

14 So far as the staff is aware, there is only one judicial decision that discusses Section 13(b)(2) of the Exchange Act in any detail, SEC v. Wold-Life-Wide Coin Investments, Ltd., 567 F. Supp. 724 (N.D. Ga. 1983), and the courts generally have found that no private right of action exists under the accounting and books and records provisions of the Exchange Act. See e.g., Lamb v. Phillip Morris Inc., 915 F.2d 1024 (6th Cir. 1990) and JS Service Center Corporation v. General Electric Technical Services Company, 937 F. Supp. 216 (S.D.N.Y. 1996).

16 Id. at 46 FR 11546.

17 Id.
in financial statements to deceive financial statement users. 43 The clear manner of presentation, or disclosures relating to amounts, classifications, the misapplication of accounting principles further states that fraudulent financial reporting is a ``cumulative process'' that should occur both in requirements, and in requiring misstatements that are immaterial to the financial statements, and registrant's system of internal accounting control that the auditor discovers in the course of the examination of the registrant's financial statements. 48 GAAP Precedence Over Industry Practice

Some have argued to the staff that registrants should be permitted to follow an industry accounting practice even though that practice is inconsistent with authoritative accounting literature. This situation might occur if a practice is developed when there are few transactions and the accounting results are clearly inconsequential, and that practice never changes despite a subsequent growth in the number or materiality of such transactions. The staff disagrees with this argument.

Authoritative literature takes precedence over industry practice that is contrary to GAAP.; 49 General Comments

This SAB is not intended to change current law or guidance in the accounting or auditing literature. 50 This SAB and the authoritative accounting literature cannot specifically address all of the novel and complex business transactions and events that may occur. Accordingly, registrants may account for, and make disclosures about, these transactions and events based on analogies to similar situations or other factors. The staff may not, however, always be persuaded that a registrant's determination is the most appropriate under the circumstances. When disagreements occur after a transaction or an event has been reported, the consequences may be severe for registrants, auditors, and, most importantly, the users of financial statements who have a right to expect consistent accounting and reporting for, and disclosure of, similar transactions and events. The staff, therefore, encourages registrants and auditors to discuss on a timely basis with the staff proposed accounting treatments for, or disclosures about, transactions or events that are not specifically covered by the existing accounting literature.
