BILLING CODE 4310-RK-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 990304063-9063-01; I.D. 081899A]

Fisheries of the Exclusive Economic Zone Off Alaska; Vessels Catching Pollock for Processing by the Inshore Component in the Bering Sea Subarea

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock by vessels catching pollock for processing by the inshore component in the critical habitat/catcher vessel operational area (CH/CVOA) of the Bering Sea subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary because the B season limit of pollock total allowable catch (TAC) specified for the inshore component within the CH/CVOA will be reached.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), August 19, 1999, until 1200 hrs, A.l.t., September 15, 1999.

FOR FURTHER INFORMATION CONTACT: Andrew Smoker, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

In accordance with § 679.20(a)(5)(i)(C)(1) and the revised emergency interim rule (64 FR 39087, July 21, 1999), the B season limit of pollock TAC specified for harvest within the CH/CVOA and processing by the inshore component is 56,648 metric tons (mt).

In accordance with § 679.22(a)(11)(iv)(A) the Administrator,

Alaska Region, NMFS, has determined that the B season limit of pollock TAC specified for harvest within the CH/CVOA and processing by the inshore component will be reached.

Consequently, NMFS is prohibiting directed fishing for pollock by vessels catching pollock for processing by the inshore component within the CH/CVOA conservation zone, as defined at § 679.22(a)(11)(iv)(B).

Maximum retainable bycatch amounts may be found in the regulations at § 679.20(e) and (f).

Classification

This action responds to the best available information recently obtained from the fishery. It must be implemented immediately in order to prevent exceeding the B season limit of pollock TAC specified for harvest within the CH/CVOA and processing by the inshore component. A delay in the effective date is impracticable and contrary to the public interest. Further delay would result in noncompliance with reasonable and prudent management measures implemented to promote the recovery of the endangered Steller sea lion. NMFS finds for good cause that the implementation of this action cannot be delayed for 30 days. Accordingly, under 5 U.S.C. 553(d), a delay in the effective date is hereby waived.

This action is required by § 679.22 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 19, 1999.

Gary C. Matlock,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

50 CFR Part 679

[Docket No. 99030463-9063-01; I.D. 072199B]

Fisheries of the Exclusive Economic Zone Off Alaska; Halibut Bycatch Mortality Allowance in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Reapportionment of Pacific halibut bycatch mortality allowance

specified for the nontrawl fishery categories.

SUMMARY: NMFS issues this final rule that reapportions the 1999 halibut bycatch mortality allowance specified for the Pacific cod hook-and-line fishery category to the other nontrawl fishery category in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to allow the harvest of species constrained by the other nontrawl halibut bycatch mortality allowance, in particular Greenland turbot, while not further restricting the hook-and-line Pacific cod fishery. This action is intended to promote the goals and objectives of the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP).

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), September 1, 1999, through 2400 hrs, A.l.t., December 31, 1999.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the FMP prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP are at subpart H of 50 CFR part 600 and 50 CFR part 679.

The BSAI halibut prohibited species catch (PSC) limit for nontrawl gear is an amount of halibut equivalent to 900 mt of halibut mortality (§ 679.21(e)(2)(i)). The apportionment of the nontrawl halibut PSC limit to bycatch allowances for the Pacific cod hook-and-line and other nontrawl fisheries was established by the Final 1999 Harvest Specifications of Groundfish for the BSAI (64 FR 12103, March 11, 1999) as 748 mt and 84 mt respectively.

A proposed rule for this action was published in the **Federal Register** on July 29, 1999 (64 FR 41068), requesting comments through August 12, 1999. One letter of comment was received during the comment period from a hook-and-line industry representative supporting the reapportionment. Based on this comment, and in order to provide greater opportunity to harvest the BSAI Greenland turbot total allowable catch (TAC) while not jeopardizing the opportunity to harvest the amount of the Pacific cod TAC allocated to hook-and line vessels, NMFS increases the halibut bycatch mortality allowance specified for the other nontrawl fishery category by 150
