

advisory committees and the qualifications of persons who have been recommended to serve. The collection provides uniform data for each individual and enables DOT to comply with the Federal Advisory Committee Act (Pub. L. 92-463) (5 U.S.C. App.) which requires that advisory committee membership be balanced.

A number of DOT'S advisory committees were created by statute and have statutory requirements for education, experience, or expertise. The data collection enables DOT to comply with such membership requirements, by providing information from which officials may determine which individuals meet specific qualification standards for particular advisory committees and for particular positions within a committee. In fact, some statutory committees require very narrow and specific expertise for each position on the committee, which can be ascertained by reviewing the Advisory Committee Candidate Biographical Information Request form.

Finally, the data collection allows officials to retain a file of interested applicants. As vacancies occur on specific advisory committees, the applications and qualifications can be reviewed for possible placement.

In the absence of the data collection, officials would have to contact by telephone or by letter each person who expressed an interest or who was recommended for an advisory committee position to determine his/her interest, education, experience, or expertise. This would be a more time-consuming and costly data collection effort which would have to be repeated if the individual were to be considered at a later time for vacancies on other advisory committees.

Respondents: Individuals who have contacted DOT to indicate an interest in appointment to an advisory committee and individuals who have been recommended for membership on an advisory committee. Only one collection is expected per individual.

Estimated Number of Respondents per year: 100.

Average Annual Burden per Respondent: 15 minutes.

Estimated Total Burden on Respondents Per Year: 25 hours.
