

funds for installation of dockside pumpouts for charterboats within the next fiscal year.

All of the vessel pumpout facilities that are in use within Key West City limits discharge directly into the collection system that delivers waste to the central waste treatment facility for Key West, otherwise known as the Richard Heyman Environmental Protection Facility. The plant achieves a secondary level of waste treatment and currently discharges the treated effluent into nearshore waters off Fort Zachary Taylor State Beach. However, the City is currently retrofitting the plant to achieve a level of advanced wastewater treatment and will be replacing the ocean outfall with deep injection wells. Currently, the City collection system is being rebuilt at a cost of several million dollars. Both the collection system improvements and the replacement of the outfall with deep injection wells will be completed within a few years pursuant to the provisions of a consent judgment with the State of Florida. The City has entered into an agreement with Reef Relief and Last Stand, two environmental organizations, to treat the effluent being injected to a level of advanced wastewater treatment to remove the nutrients prior to injection.

Thus all wastewater collected at the vessel pumpout facilities will be treated to meet existing standards for secondary treatment and will eventually meet the higher standard of advanced wastewater treatment. This action is being taken in consideration of the need to reduce nutrient loading to nearshore waters.

The number of boats with marine sanitation devices (MSD) varies seasonally. According to Key West marina operators, approximately 628 boats with heads is a reasonable average. Therefore, the ratio of boats with MSDs to pumpout facilities is 126 boats per pumpout facility, plus a mobile pumpout service.

Comments concerning this action may be filed on or before September 24, 1999. Such communications should be addressed to Wesley B. Crum, Chief, Coastal and Nonpoint Source Programs Section, USEPA, Region 4, Sam Nunn Federal Center, 61 Forsyth Street SW, Atlanta, Georgia 30303-3104. Telephone 404-562-9352.
