Summary of the Proposed Information Collection

The forms are for use by the Commission in connection with the ITC DataWeb Public Access Project. The ITC DataWeb provides on-line, rapid and customized retrieval of U.S. trade and tariff data and has been an Internet tool primarily for government users. The interagency International Trade Data System (ITDS) board chairman has requested that the ITC DataWeb be made formally available to the public. The purpose of the public access project is to assess the additional costs of making this service formally available to the general public and to evaluate benefits. The user registration forms are required to accurately track usage, data reports generated, and costs by user sectors and to save user product and country lists for user reference during future logins. The forms would appear on the ITC DataWeb internet site (<http://dataweb.usitc.gov>) and would need to be filled out only once.
