

analyzed in the plan. These alternatives will be developed based on internal staff discussions, public comments, and meeting with government agencies. Tentative issues for discussion include off-highway vehicle use, livestock grazing, noxious weeds, and timber harvest. One alternative will be a "no action" alternative (continuation of the present management program), based on the 1995 approved Medford RMP. Another alternative will provide for greater restrictions on current uses and potential interagency coordination to meet landscape-level management objectives. Other alternatives will provide for road and trail designations and maintenance management programs comprising various combinations of resource uses and land allocations.

The BLM is seeking information, comments, and assistance from federal, state, and local agencies and other individuals or organizations interested in or affected by the proposed action.

The analysis will be completed by an interdisciplinary team. Disciplines to be represented on the team include, but are not limited to: archaeology, anthropology, botany, fire management, fisheries, forestry, geology and minerals, hydrology, realty, recreation, wilderness, and soils.
