#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is correct.

The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents. (29 U.S.C. 657.) Section 1910.268 requires that employees be trained in hazards associated with their work. Paragraph (c) of 1910.268 requires that employers generate a record to certify the training was done. The record includes the name of the employee trained, the date the employee was trained and the signature of the employer or person who conducted the training.

##### II. Proposed Actions

OSHA proposes to increase its earlier estimate of 17,118 burden hours for the information collection requirements in 29 CFR 1910.268(c) (training certification records) to 61,983 burden hours.

OSHA will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB to extend the approval of the information collection requirement contained in the above provision.
