RIN 3150-AG07

Electronic Availability of NRC Public Records and Ending of NRC Local Public Document Room Program

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to reflect a change in the way its records are made available to the public. The amendments reflect the NRC's decision to implement a new document management system that will permit the electronic storage, retrieval, and on-line ordering of publicly available NRC official records through the NRC Web site.

EFFECTIVE DATE: October 12, 1999.

FOR FURTHER INFORMATION CONTACT: Russell A. Powell, Chief, Information Services Branch, Information Management Division, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone (301) 415-6527, email: RAP1@nrc.gov.

SUPPLEMENTARY INFORMATION:

The Nuclear Regulatory Commission (NRC) is amending its regulations to reflect the use of a new electronic record keeping system for NRC records. The NRC is establishing the Agencywide Documents Access and Management System (ADAMS) to provide for the electronic submission, storage, and retrieval of NRC official records. When ADAMS becomes operational, any NRC official records that are normally publicly available under the Commission's regulations will be available electronically through ADAMS. The regulations governing which records are publicly available are unaffected by this final rule. Publicly available records will be accessible electronically from the ADAMS Public Library component on the NRC Web site, <http://www.nrc.gov> (the Electronic Reading Room).

When ADAMS becomes operational, NRC will discontinue furnishing paper and microfiche copies of its publicly available records to the NRC Public Document Room (PDR), located in Washington, DC, and the Local Public Document Rooms (LPDRs), located near nuclear power plants and other nuclear facilities. Under ADAMS, NRC will initially begin making available

electronically through the Electronic Reading Room on the NRC Internet Web site, imaged copies of its newly received and created publicly available official records that are in paper form. However, ultimately, NRC's newly created official records will all be stored in ADAMS only in electronic form, and NRC will maintain only its pre-ADAMS records as paper copies. Because of budget constraints and the improved access to newly received and created records via the NRC Web site under ADAMS, the Commission decided to discontinue funding of the LPDR program beyond Fiscal Year 1999.

The NRC currently maintains 86 LPDRs in the vicinity of nuclear reactor and materials licensees: 72 support power reactors; 2 support gaseous diffusion plants; 3 support high-level waste repositories; and the remaining 9 support fuel-cycle, low-level waste, and other facilities. A survey of the facilities where LPDRs are currently located revealed that all but six now provide, or will provide Internet access to its patrons by the end of 1999.

Additionally, although NRC plans to discontinue the LPDR program, it has offered each of the current LPDR libraries the opportunity to keep their current LPDR document collections so the pre-ADAMS LPDR collections can continue to be available in the local communities. Of the 86 current LPDRs, 64 have expressed an interest in maintaining their current LPDR document collections after the LPDR program is discontinued. The decision to accept this offer to transfer ownership of these collections and the length of time they will be maintained will be at the sole discretion of each library.

In addition, the Government Printing Office (GPO) has agreed to accept the LPDR microfiche collections that were not kept by the current LPDR libraries. GPO will place these collections in their Federal Depository Library Program (FDLP). This assures the continuation of at least one LPDR microfiche collection in each of the states which now has one.

ADAMS will provide the following added benefits that should preclude or minimize any public concerns regarding the impact from discontinuing the LPDR program:

1. ADAMS Internet access will provide access to new records in full text and image.
2. ADAMS will provide an improved electronic search capability. Under the existing system, only the bibliographic indexes and abstracts for most records are available from the online BRS and NUDOCS.
3. Some new records will be available to the public within days instead of the

two weeks or longer it now takes for LPDRs to receive microfiche or paper copies of new accessions.

4. Internet public access to the NRC Web site will provide direct access to a much broader range of the public than just to those who, because of their close proximity, have access to the PDR and LPDRs.

The NRC PDR will still have pre-ADAMS paper and microfiche records on site and available to the public for viewing and copying. The PDR will also have computer terminals available for the public to access new documents on the NRC Web site. The public will still be able to obtain paper copies of new electronic records by printing them from the NRC Internet Web site, by ordering them for a fee from the PDR directly from the NRC Web site, or by using current ordering methods. The current methods are: in-person at the PDR, mail, e-mail, fax or by calling the PDR Reference Services on the toll-free 800 telephone number. Bibliographic descriptions of documents currently identified in the PDR's Bibliographic Retrieval System (BRS) and in NUDOCS will be posted on the NRC Web site. This will also allow the public to order copies of pre-ADAMS paper and microfiche records. The public will also have access to the NRC Web site from any computer with Internet access, and will be able to download the records to the computer they are using for printing or other supported functions.

Public Comment Summary

The NRC published a proposed rule on May 7, 1999, (64 FR 24531). In response, the NRC received ten comments from the public. The comments are addressed individually below:

1. Martha Dibblee, Received via Email May 14, 1999

Comment: If you eliminate the public document room and put it on the Internet (which I believe is a wonderful idea since I use the Internet) the rule or an appendix should include a list of public libraries in the U.S.

Response: The Public Document Room (PDR), in Washington, DC, is not being eliminated. The Local Public Document Room (LPDR) program, supporting document collections set up in libraries near nuclear facilities, is being discontinued. However, most of those libraries are retaining their collections. A list of public libraries in the U.S. should be available at any public library as well as on the Internet.

2. Connecticut Yankee Atomic Power Company (CYAPCO), Dated May 20, 1999

Comment: CYAPCO fully supports the NRC's initiative to implement a new document management system that would permit the electronic storage, retrieval, and on-line ordering of publicly available NRC official records through the NRC Web site.

Response: NRC considers this comment supportive of the rule and it requires no further response.

Comment: CYAPCO also supports expanded use of ADAMS for electronic licensee submittals and agency documents for docketed correspondence.

Response: NRC considers this comment supportive of the rule and it requires no further response.

3. State of Illinois, Department of Nuclear Safety (IDNS), Dated May 27, 1999

Comment: IDNS supports the expanded availability of NRC records through the NRC Web site. This should facilitate greater public access to the records and cost savings to NRC.

Response: NRC considers this comment supportive of the rule and it requires no further response.

Comment: Will documents relating to Part 30 and Part 40 licenses be available on the NRC's Web site?

Response: Yes, publicly available documents received or created after the implementation of ADAMS, relating to part 30 and part 40 licenses will be available on the NRC's Web site. Documents prior to the implementation of ADAMS, will not routinely be placed into the ADAMS system, but they can be identified from the legacy systems indexes available online in the ADAMS Electronic Reading Room and ordered from the PDR; or, if convenient, can be accessed on the microfiche at one of the libraries that has retained the LPDR record collection. Those libraries and their locations will be identified on the NRC Web site.

Comment: NRC, not licensees, will be responsible for imaging paper copies into electronic form. Is this correct? How will NRC handle oversized documents?

Response: Yes, NRC will be responsible for imaging paper copies if licensees do not submit documents in electronic form, including oversized documents.

Comment: Is there a legal requirement that facilities, where LPDRs are currently located, provide Internet access?

Response: No, NRC has no authority to do so and has never established any

requirement that facilities where LPDRs are currently located provide Internet access.

Comment: Whose responsibility is it to provide and maintain such access?

Response: The decision as to whether or not an LPDR or any other public or educational library provides and/or maintains Internet access is not within NRC's jurisdiction. However, under the Telecommunications Act of 1996, the Federal government is supporting Internet access from public libraries and schools through fees collected under regulations issued by the Federal Communications Commission. Likewise, many States have programs supporting Internet access from public libraries.

Comment: Has it been determined that such Internet access is Y2K compliant? If not, when will Y2K compliance be determined?

Response: NRC has no jurisdiction over Internet access at any of its current LPDR library facilities, including whether or not such access is Y2K compliant.

4. Lynn Connor, Portland, Oregon, Dated June 15, 1999

Comment: I believe it is impossible to provide any meaningful comment on a system that is not yet operational and for which there is very little public information available on how it will work.

Response: NRC acknowledges this comment and believes that sufficient information has been provided regarding the planned operation of the new system.

5. Sarah M. Fields, Moab, Utah, Dated June 21, 1999

Comment: The NRC should maintain at least one LPDR in each state that currently has an LPDR.

Response: Of the 73 LPDRs that have microfiche, 54 have agreed to keep their collections and the remaining 19 will be transferred to the GPO Federal Depository Library Program, assuring the continuation of at least one LPDR collection in each of the states which now has one. The libraries that currently house the collections to be relocated will receive the final shipments of microfiche from the current document management system, making the collections complete before any transfers. The LPDRs that have opted to keep their collections have been asked to contact the GPO first before making any disposition decisions if they change their mind and no longer wish to maintain their collections.

Comment: The NRC should facilitate the transfer of the LPDR collection from

any LPDR which does not wish to keep its collection to an appropriate library near the site of uranium mills which have operated under license to the AEC and/or the NRC.

Response: See response to previous comment.

Comment: The NRC should establish a priority list for the transfer of LPDR collections to mill site areas. First on the list should be the Grants and Gallup areas of New Mexico, Wyoming, and southeastern Utah.

Response: The first priority that NRC established was to allow current LPDR libraries to keep the collections they now have. The next priority was to transfer any microfiche collections that LPDR libraries did not elect to keep to the GPO for placement in their Federal Depository Library Program (FDLP) in, at minimum, each of the states which now has an LPDR microfiche collection. The NRC currently maintains an LPDR in the Grants and Gallup areas of New Mexico, located at the Dine College, Crownpoint, New Mexico. An LPDR also exists in the state of Utah at the Marriott Library, University of Utah, Salt Lake City. Both of those libraries have elected to keep their collections. There is not currently an LPDR in the state of Wyoming.

The change will not lessen the public's accessibility to NRC information, except to those few who, because of their close proximity, have had convenient access to the PDR and LPDRs prior to relocation of an LPDR. Overall, public access to the NRC Web site via the Internet will provide direct access to a much broader range of the public than just those few for whom they were conveniently located before the move. The public can now use any access to the Internet to access NRC publicly available documents, whether it be from a public, college, or university library, their place of business, or their home using their own personal computer.

6. Nuclear Energy Institute (NEI), Dated June 21, 1999

Comment: NEI commends the NRC on its initiative to make its records available electronically. The availability of NRC records via an electronic format will provide broader, more timely access of this information to all of the NRC's stakeholders. Furthermore, the cost savings that will be realized through the elimination of the Local Public Document Room (LPDRs) will be beneficial to all stakeholders.

Response: NRC considers this comment supportive of the rule and it requires no further response.

7. Licensing Support Services, Dated June 18, 1999

Comment: It is prudent to try out a new system first, to debut it and verify that it can accomplish what is intended, before abandoning the tried-and-true method it is to replace.

Response: The NRC's current document management system, NUDOCS, was not Y2K compliant. A decision had to be made whether to expend funds to keep that system operating after ADAMS. The NRC determined that it was not economically feasible to keep NUDOCS operational.

Comment: The likelihood of a delay in implementing ADAMS, combined with the end of support for LPDRs at the beginning of FY00, makes it very likely that public access to information will be interrupted for a time.

Response: ADAMS should begin providing public access to documents effective October 1999. Public access to information is not expected to be interrupted. As previously described, most of the current LPDRs that have microfiche have agreed to keep their collections and the remaining ones will be transferred to the GPO Federal Depository Library Program. Should ADAMS implementation be delayed, NRC would continue with the current process until the new system is in place.

Comment: LSS is concerned that the volume of material, and the practical needs of preparing it for web availability, will make it difficult or impossible to fulfill the promise made in the proposed rule.

Response: Currently, documents to be posted to the Web site have to first be coded in hypertext markup language. This process can take several days. However, ADAMS is not currently being used for the posting of documents to the web. ADAMS does not require coding to post to the Web and, when it becomes operational, the only delays in release will be those which the NRC staff purposely establishes to preclude premature releases to the public.

8. Unsigned and Undated, Received June 24, 1999

Comment: The commenter provides various comments regarding concerns or dissatisfaction with the current status of public accessibility to records and interest in expansion of the current LPDR system.

Response: The proposed rule announced the change in the way the NRC will provide publicly available information. The change will not lessen the accessibility to NRC information, except perhaps in a few instances where LPDRs relocate, thereby making access

to those records less accessible to those for whom they were conveniently located before the move. Overall, public access to the NRC Web site via the Internet will provide direct access to a much broader range of the public than just to those few who, because of their close proximity, have had convenient access to the PDR and LPDRs. The public can now use any access to the Internet to access NRC publicly available documents, whether it be from a public, college, or university library, their place of business, or their home using their own personal computer. These changes to NRC regulations only affect the way records are made available to the public by formally discontinuing the LPDR program and making the Web the main avenue for public access. No other changes have been made or addressed.

Comment: Has NRC done an assessment of the use of the LPDRs and how do members of the public feel about NRC's plans?

Response: Over the years, NRC has received quarterly reports of public usage of the LPDRs and found use at many of them to be minimal. Based on the limited number of comments in response to the proposed rule and other miscellaneous responses in direct conversations with LPDR librarians, the current PDR and LPDR users welcome the new system which promises to provide much broader and easier access than currently available.

Comment: Should users be forced to pay a fee to access NRC documents?

Response: Libraries do not charge their patrons to view on the Internet, but as with paper copies, charges may be made for printing. Users now pay fees for copies of documents whether they obtain them from the PDR or the LPDR. Under ADAMS, many users will be able to obtain documents at no cost via their home computers by downloading to a disk or printing a document. However, just as they do now, the public can still order documents from the PDR for a fee.

Comment: The NRC needs a customer feedback process to ensure that public's comments are obtained and acted upon during the transition period.

Response: NRC is very much aware of the need for public feedback to resolve problems that are certain to be encountered in this major transition. The PDR will continue to serve as the public interface to assist the public in obtaining timely and full access to NRC's publicly available information and the ADAMS Web site will provide information and a means for the public to ask questions and provide comments.

Comment: Will NRC fund and maintain and upgrade the computer terminals, software, and printers in LPDRs?

Response: No. The NRC is discontinuing its LPDR program and will no longer be funding libraries that keep those collections.

Comment: If NRC is replacing the LPDR with the Internet why can't those records made available through NTIS also be made available through the Internet?

Response: Records made available through NTIS will be available through the Internet in ADAMS.

Comment: Shouldn't NRC build a relational information system such that a member of the public can locate all NRC and licensee information, including upcoming meetings about a specific licensee?

Response: The PDR staff has been assigned primary responsibility for the design of the organizational scheme for ADAMS to ensure that the transition from the current systems (BRS and NUDOCS) for locating documents to ADAMS will be as easy as possible for the public.

9. Winston & Strawn, Dated June 23, 1999

Comment: Given the magnitude and volume of official record material created and received by the Agency, we urge that a similar organizational scheme be adopted for the ADAMS to help facilitate the public access to documents by docket number, reference group, or subject area.

Response: See the previous response.

Comment: We recommend that the ADAMS or the PDR accommodate the public availability of records that are not suitable for electronic dissemination (e.g. video tapes, audio tapes, etc.).

Response: The NRC will accommodate the public availability of records that are not suitable for electronic dissemination.

Comment: Will imaged records in the ADAMS include the official NRC watermark and signature?

Response: The electronic copy of documents in ADAMS will show a signature (and watermark if it is present and visible enough to be imaged) just as is currently available in the microfiche and photocopies of paper records.

Comment: We believe that all NUREGs should be available on ADAMS.

Response: All publicly available NUREGs published after the implementation of ADAMS will be available in ADAMS. NUREGs published before the implementation of

ADAMS may be placed in ADAMS on a selective basis.

Comment: The NRC should implement controls to ensure that the document processing contractor is properly qualified to classify "externally generated" documents.

Response: The NRC document processing contractor is the same contractor that processed documents under the NUDOCS system and will be qualified to classify those documents it processes under ADAMS. The document processing contractor determines the public availability of documents only for certain documents using pre-determined criteria. All others are made publicly available by staff review of the documents and instructions to the document processing contractor or by the staff processing them directly into ADAMS.

Comment: The NRC should include an advance copy public library in the ADAMS architecture.

Response: There will not be a need for an advance copy public library, since once a document is marked to be released to the public, the release is made. There will not be any backlog of unprocessed documents in this document management system.

10. Gerry C. Slagis, Pleasant Hill, CA, Dated June 23, 1999

Comment: I applaud the use of ADAMS to make NRC official records available to the public. However, I am against the shutting down of the LPDR program beyond Fiscal Year 1999. The problem is public access to the NRC official records prior to ADAMS. A person needs to be able to view the documents before copying certain pages or ordering the entire document.

Response: Although the NRC is going to discontinue the LPDR program at the end of September 1999, documents issued prior to ADAMS implementation will still be accessible to the public. Documents published or issued before the implementation of ADAMS, will not routinely be placed into the ADAMS system. However, these documents can be identified from the legacy systems (BRS and NUDOCS) indexes available online in the ADAMS Electronic Reading Room and ordered from the PDR; or, if convenient, can be accessed on the microfiche at one of the libraries that has retained the LPDR record collection. Most of the LPDRs are keeping their microfiche collections. Therefore, most of the public who have access to an LPDR now will continue to have access after ADAMS is operational. Those libraries and their locations will be identified on the NRC Web site.

Because records will be released electronically to the public rather than in paper or microfiche, this rule amends the regulations in 10 CFR Parts 1, 2, 7, 9, 50, 51, 52, 60, 62, 72, 75, 76, 100, and 110 to reflect the manner in which these records would be made publicly available.

To reflect the discontinuance of NRC support of libraries serving as LPDRs, references to NRC LPDRs will be deleted in 10 CFR 2.1231(a)(1)(ii), and (b); 9.35 (b) and (e); 50.30(a)(5); part 50 Appendix Q, section 4; 51.120; part 52, Appendix O, section 5; part 52, Appendix Q, section 4, and 76.37(a).

In addition, several other minor conforming changes will be made. The definition of the PDR in 10 CFR 2.4, 60.2, and 110.2 is now in a new paragraph and will be revised to reflect that records newly created or received since the implementation of ADAMS that are publicly available are now available in the PDR in electronic form for inspection and copying, and that copies can be ordered from the PDR. A new paragraph will define the NRC Web site as the Internet location where NRC records are made available for public inspection and copying and that the public can also order copies of documents from the PDR through the NRC Web site.

Section 9.2(a) will be revised to delete the reference to the availability of records on 48x microfiche through the National Technical Information Service (NTIS). When NRC begins making its records available from the NRC Web site, microfiche copies will no longer be produced. The address for the NTIS and a statement that certain listed documents can be ordered from the NTIS will be added to 9.21(a). Section 9.21(d) will be deleted because the publication Title List of Documents Made Publicly Available, NUREG-0540, will no longer be published. Section 9.21(e) will be revised to show that only the published versions of final opinions and orders, referred to in 9.2(c)(1), are available from the NTIS in the publication, Nuclear Regulatory Issuances (NUREG-0750). The reference to interpretations in 9.21(c)(2) will be deleted because they are not available from NTIS.

Section 9.23(a)(2) will be deleted because it repeats information included in the revised 9.21(a). Section 51.123(a) and (b) will be revised to reflect the correct address where requests for draft environmental impact statements and draft findings of no significant hazard can be submitted.

Changes are made in several sections to reflect the correct name of the NRC

PDR. In addition, several misspelling corrections are made.

National Technology Transfer and Advancement Act

The National Technology Transfer and Advancement Act of 1995, Pub. L. 104-113, requires that Federal agencies use technical standards developed or adopted by voluntary consensus standards bodies unless the use of such a standard is inconsistent with applicable law or is otherwise impractical. There are no industry consensus standards that apply to the electronic availability of public records. Thus, the provisions of the Act do not apply to this rulemaking.

Environmental Impact—Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(1) and (2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

Paperwork Reduction Act Statement

This final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Existing requirements were approved by the Office of Management and Budget, approval numbers 3150-0043, 3150-0011, 3150-0021, 3150-0151, 3150-0127, 3150-0143, 3150-0132, 3150-0055, 3150-0093, and 3150-0036.

Public Protection Notification

If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

Regulatory Analysis

This final rule implements a new NRC procedure for making records available for public inspection and copying. This rule does not have any adverse economic impact on any class of licensee or the NRC. To the contrary, the final rule with its new provisions allowing Internet access from homes, offices, schools, and public libraries to NRC publicly released records provides some new and additional benefits to those seeking access to NRC records. A survey of the facilities where LPDRs are currently located revealed that all but six now provide, or will provide, Internet access to its patrons by the end of 1999. Additionally, although NRC plans to discontinue the LPDR program,

it has offered each of the current LPDR libraries the opportunity to keep their current LPDR document collections so the pre-ADAMS LPDR collections can continue to be available in the local communities. Of the 86 current LPDRs, 64 have expressed an interest in maintaining their current LPDR document collections after the LPDR program is discontinued. This constitutes the regulatory analysis for this rule.

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that this rule does not have a significant economic impact upon a substantial number of small entities. The final rule implements a new procedure for making records available to the public. The NRC believes that the changes will not have an adverse economic impact on any class of licensee, including small entities, or the general public. On the contrary, the NRC believes that the final rule provides wider opportunities and make it easier for interested persons to obtain or review publicly available NRC records.

Backfit Analysis

The NRC has determined that the backfit rule does not apply to this final rule; and therefore, a backfit analysis is not required for this final rule because these amendments do not involve any provisions that would impose backfits as defined in 10 CFR chapter I.

Small Business Regulatory Enforcement Fairness Act

In accordance with the Small Business Regulatory Enforcement Fairness Act of 1996, the NRC has determined that this action is not a major rule and has verified this determination with the Office of Information and Regulatory Affairs of OMB.

It is also the place where NRC makes computer terminals available to access the Electronic Reading Room component of ADAMS on the NRC Web site, <http://www.nrc.gov>, and where copies can be made or ordered as set forth in § 9.35 of this chapter. The facility is staffed with reference librarians to assist the public in identifying and locating documents and in using the NRC Web site and ADAMS. The NRC Public Document Room is open from 7:45 am to 4:15 pm, Monday through Friday, except on Federal holidays. Reference service and access to documents may also be requested by telephone (202-634-3273 or 800-397-4209) between 8:30 am and 4:15 pm, or by e-mail (PDR@nrc.gov), fax (202-634-3343), or letter (NRC Public Document Room, LL-6, Washington, D.C. 20555-0001).

NRC Web site, <http://www.nrc.gov>, is the Internet uniform resource locator name for the Internet address of the Web site where NRC will ordinarily make available its public records for inspection.

application. A copy of the tendered application will be available for public inspection at the NRC Web site, <http://www.nrc.gov>, and/or at the NRC Public Document Room. Generally, the determination on acceptability for docketing will be made within a period of thirty (30) days. However, in selected construction permit applications, the Commission may decide to determine acceptability on the basis of the technical adequacy of the application as well as its completeness. In these cases, the Commission, pursuant to § 2.104(a), will direct that the notice of hearing be issued as soon as practicable after the application has been tendered, and the determination of acceptability will be made generally within a period of sixty (60) days. * * * * *

(b) * * *

When any book, document or other tangible thing sought is reasonably available from another source, such as at the NRC Web site, <http://www.nrc.gov>, and/or the NRC Public Document Room, sufficient response to an interrogatory involving such materials would be the location, the title and a page reference to the relevant book, document or tangible thing. In a proceeding on an application for a construction permit or an operating license for a production or utilization facility, discovery begins only after the prehearing conference provided for in § 2.751a and relates only to those matters in controversy which have been identified by the Commission or the presiding officer in the prehearing order entered at the conclusion of that prehearing conference. In such a proceeding, no discovery may take place after the beginning of the prehearing conference held pursuant to § 2.752 except upon leave of the presiding officer upon good cause shown. It is not ground for objection that the information sought will be inadmissible at the hearing if the information sought appears reasonably calculated to lead to the discovery of admissible evidence.

10. In § 2.750, paragraph (a) is revised to read as follows:

§ 2.750 Official reporter; transcript.

If, within the time specified in the notice, the applicant requests withdrawal of the document, the document will not be available at the NRC Web site, <http://www.nrc.gov>, and will be returned to the applicant: Provided, that information submitted in a rule making proceeding which subsequently forms the basis for the final rule will not be withheld from public disclosure by the Commission and will not be returned to the applicant after denial of any application for withholding submitted in connection with that information. Both the ACRS recommendation and the Commission's response will be made available at the NRC Web site, <http://www.nrc.gov>, following transmittal of the Commission's response to the ACRS.

Bureau of Export Administration

15 CFR Part 774

[Docket No. 990811216-9216-01]

RIN 0694-AB81

Correction to Editorial Clarifications and Revisions to the Export Administration Regulations

AGENCY: Bureau of Export Administration, Commerce.
ACTION: Final rule; technical amendment.

SUMMARY: On August 30, 1999 (64 FR 47104), the Bureau of Export Administration published an interim rule revising the Export Administration Regulations (EAR) by making certain editorial revisions and clarifications. Instruction No. 16 of that regulation inadvertently removed Firearms controls from ECCN 0A984.

This regulation amends the Commerce Control List (CCL) by revising ECCN 0A984 to include Firearms controls for the entire entry.

DATES: This rule is effective August 30, 1999.

FOR FURTHER INFORMATION CONTACT: Frank J. Ruggiero, Office of Exporter Services, Bureau of Export Administration, Telephone: (202) 482-2440.

SUPPLEMENTARY INFORMATION: Although the Export Administration Act (EAA) expired on August 20, 1994, the President invoked the International Emergency Economic Powers Act and continued in effect the EAR, and to the extent permitted by law, the provisions of the EAA, as amended, in Executive Order 12924 of August 19, 1994, as extended by the President's notices of August 15, 1995 (60 FR 42767), August 14, 1996 (61 FR 42527) August 13, 1997 (62 FR 43629), August 13, 1998 (63 FR 44121), and August 10, 1999 (64 FR 44101).

Rulemaking Requirements

1. This final rule has been determined to be not significant for the purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to nor be subject to a penalty for failure to comply with a collection

of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. This rule involves collections of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These collections have been approved by the Office of Management and Budget under control numbers 0694-0088, 0694-0023, and 0694-0106. There are neither additions nor subtractions to these collections due to this rule.

3. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

4. The provisions of the Administrative Procedure Act requiring notice of proposed Rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a military or foreign affairs function of the United States (see 5 U.S.C. 553(a)(1)). Further, no other law requires that a notice of proposed Rulemaking and an opportunity for public comment be given for this rule. Because a notice of proposed Rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are inapplicable.

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis. Comments should be submitted to Frank J. Ruggiero, Office of Exporter Services, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.
