Number of responses annually | Number of responses per respondent | Average burden hours per response | Total annual burden hours
--- | --- | --- | ---
91 | 1.714" | 81.58 | 12,724

*Derived by dividing the total number of responses expected annually (156) by the number of respondents (91) and rounding to three places.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information, including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is $672,225 (12,724 hours divided by 2,080 hours per full-time employee-year multiplied times $109,889 per year (the estimated average salary per employee (including overhead expenses)) = $672,225).

There is a net increase of 977 hours in the total burden hours over the last Office of Management and Budget (OMB) clearance of the FERC-567 data collection, from 11,747 hours to 12,724 hours. This increase is an adjustment resulting from an increase in the number of respondents from 89 to 91 with a simultaneous increase in the number of responses per respondent from 1.62 to 1.71 (rounded). The number of responses per respondent is greater than one because some respondents are required to file both of the FERC-567 filing requirements while others are required to submit only one of the two.

The estimated reporting cost to respondents is $672,225 (12,724 hours divided by 2,080 hours per full-time employee-year multiplied times $109,889 per year (the estimated average salary per employee (including overhead expenses)) = $672,225).
