

days, and of the date of the closing of the sale and transfer of the City's interest to FPC no later than seven business days prior to the date of closing. Should the transfer not be completed by December 31, 1999, this Order shall become null and void, provided, however, on application and for good cause shown, such date may be extended.

*It is further ordered* that, consistent with 10 CFR 2.1315(b), a license amendment that makes changes, as indicated in Enclosure 2 to the cover letter forwarding this Order, to conform the license to reflect the subject license transfer is approved. Such amendment shall be issued and made effective at the time the proposed license transfer is completed.

This Order is effective upon issuance.

For further details with respect to this Order, see the initial application dated December 29, 1998, and supplement dated June 18, 1999, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Coastal Region Library, 8619 W. Crystal Street, Crystal River, Florida 34428.

Dated at Rockville, Maryland, this 8th day of September 1999.

or the Nuclear Regulatory Commission.

## NUCLEAR REGULATORY COMMISSION

### Licensing Support Network Advisory Review Panel

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of public meeting.

**SUMMARY:** The Licensing Support Network Advisory Review Panel (LSNARP) will hold a meeting on October 13, 1999, at the Embassy Suites Hotel, 4315 Swenson St., Las Vegas, Nevada. The meeting will be open to the public pursuant to the Federal Advisory Committee Act (Pub. L. 94-463, 86 Stat. 770-776).

**AGENDA:** The meeting will begin at 8:30 a.m. on Wednesday, October 13, 1999, and continue that day until completed. The purpose of the meeting is to discuss issues relating to the design, development, and operation of the Licensing Support Network (LSN), the

Internet-based successor to the Licensing Support System (LSS).

As was explained in the final rule establishing the LSN, which was published in the **Federal Register** on January 29, 1999 (63 FR 71729), the LSN is intended to provide a pre-application discovery database consisting of Internet-accessible sites that would be operated by the potential parties to the proceeding, including the United States Department of Energy (DOE) and the NRC. The pre-application availability of these discovery materials is intended to ensure compliance with the schedule for a decision on the construction authorization for the high-level nuclear waste (HLW) repository contained in Section 114(d) of the Nuclear Waste Policy Act.

**SUPPLEMENTARY INFORMATION:** In 1999, the NRC re-established the LSNARP as a successor to the LSS Advisory Review Panel (LSSARP). Like the LSSARP, the LSNARP is to provide advice and recommendations to the NRC, including the LSN Administrator, concerning the design, development, and operation of an LSN electronic information management system for the storage and retrieval of information relevant to the Commission's future licensing proceeding for a geologic repository for HLW disposal. When the NRC Rules of Practice in 10 CFR part 2, Subpart J, recently were modified to provide an Internet-based technological solution to the submission and management of records and documents relating to the licensing of a HLW repository, pursuant to 10 CFR 2.1011(e) the LSNARP was re-established to provide advice on such issues as the type of computer system necessary to comply with the requirements for electronic document production and service; the operation, maintenance, and compliance monitoring of the electronic document databases established for the potential participants to the HLW repository licensing proceeding; and solutions to improve the LSN functioning once it is operational.

**FOR FURTHER INFORMATION CONTACT:** U.S. Nuclear Regulatory Commission, Atomic Safety and Licensing Board Panel, Mail Stop T-3-F23, Washington, DC 20555 Attn: John C. Hoyle (telephone 301-415-7467; fax 301-415-5599; e-mail JCH@NRC.GOV) or Jack G. Whetstone (telephone 301-415-7391; fax 301-415-5599; e-mail JGW@NRC.GOV).

### Public Participation

Prior to the LSNARP meeting, the LSN Administrator will make available to interested persons materials that

outline policies and issues relating to LSN design, development, and operation. Interested persons may make oral presentations to the LSNARP or file written statements regarding these matters. Requests for oral presentations should be made to one of the contact persons listed above as far in advance as practicable so that appropriate arrangements can be made. Any person having a written statement that they wish to have before the LSNARP at the time of the meeting should provide that statement so that it is received electronically, by facsimile transmission, or by mail by one of the contacts listed above on or before Wednesday, October 6, 1999.

A number of HLW repository-related meetings and conferences are being held in the Las Vegas, Nevada area in October 1999. Nonetheless, interested persons should be aware that LSN design options will be developed based on the input from those attending this LSNARP meeting and any written statements provided by interested persons in connection with this meeting. Accordingly, all interested persons are urged to attend the October 13, 1999 meeting at which these matters will be discussed and/or to submit written statements providing their views on these matters.

Dated: September 9, 1999.

## NUCLEAR REGULATORY COMMISSION

### Public Stakeholder Meeting Concerning the Revision of the Safety Inspection Program for Nuclear Fuel Cycle Facilities

**AGENCY:** Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of meeting.

**SUMMARY:** The NRC published a meeting notice in the **Federal Register** on September 9, 1999 (64 FR 49031). The location of that meeting has been changed to the NRC's Commissioner's Hearing Room (see **ADDRESSES** section). The meeting is necessary to provide the public, those regulated by the NRC, and other stakeholders, with information about and an opportunity to provide views on how NRC plans to revise its safety inspection program for nuclear fuel cycle facilities. Similar to the revisions of the inspection and oversight program for commercial nuclear power plants, NRC has initiated an effort to
