NUCLEAR REGULATORY COMMISSION

[Docket No. 50-482]

Wolf Creek Nuclear Operating Corporation; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Wolf Creek Nuclear Operating Corporation (the licensee) to withdraw its June 30, 1999, application for proposed amendment to Facility Operating License No. NPF-42 for the Wolf Creek Nuclear Generating Station, Unit 1, located in Coffey County, Kansas.

The proposed amendment would have revised Technical Specification 3.7.5 regarding the allowed value of the ultimate heat sink temperature. The Commission issued Amendment No. 125 on July 8, 1999, that revised the maximum allowed value of the ultimate heat sink temperature to 94°F. In the June 30, 1999, letter, the licensee proposed a maximum plant inlet water temperature of 95°F; however Amendment No. 125 only approved a maximum value of 94°F to allow the amendment to be within the scope of the no significant hazards considerations published in the **Federal Register** on February 24, 1999 (64 FR 9203) and to be issued before the hot weather period of July and August 1999 in and around the Wolf Creek Generating Station. The Commission issued a Notice of Consideration of Issuance of Amendment for the June 30, 1999, request that was published in the **Federal Register** on July 15, 1999 (64 FR 38221). However, by conference call of September 8, 1999, the licensee withdrew the proposed change because the hot weather period of 1999 had past.

For further details with respect to this action, see the application for amendment dated June 30, 1999. The above document is available for public inspection at the Commission's Public Document Room, the Gelman Building,

2120 L Street, NW., Washington, DC, and at the local public document rooms located at the Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and the Washburn University School of Law Library, Topeka, Kansas 66621.

Dated at Rockville, Maryland, this 22nd day of September 1999.

For the Nuclear Regulatory Commission.

Jack N. Donohew,

Senior Project Manager, Section 2, Project Directorate IV and Decommissioning Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

SUPPLEMENTARY INFORMATION: The PBGC is requesting that OMB extend its approval (with modifications) of a collection of information needed to pay participants and beneficiaries who may be entitled to pension benefits under a defined benefit plan that has terminated. The collection consists of information participants and beneficiaries are asked to provide in connection with an application for benefits. In addition, in some instances, as part of a search for participants and beneficiaries who may be entitled to benefits, the PBGC requests individuals to provide identifying information that the individual would provide as part of an initial contact with the PBGC. All requested information is needed to enable the PBGC to determine benefit entitlements and to make appropriate payments.

The existing collection of information was approved under control number 1212-0055 (expires June 30, 2000). The PBGC has revised the existing forms to simplify language and incorporate regulatory changes.

The PBGC estimates that 72,250 benefit application or information forms will be filed annually by individuals entitled to benefits from the PBGC and that the associated burden is 30,625 hours (an average of slightly less than 30 minutes per individual) and \$23,512.50. The PBGC further estimates that 5,500 individuals annually will provide the PBGC with identifying information as part of an initial contact and that the associated burden is 1,500 hours (an average of about 15 minutes per individual) and \$990. Thus, the total estimated annual burden associated with this collection of information is 32,125 hours and \$24,502.50.
