

additional net sizes and styles has also not taken place. One vessel is currently collecting information on a Parker TED with a modified panel, to determine whether the modified panel excludes more finfish bycatch. NMFS believes that extending the approved use of the Parker TED for an additional year will allow additional information to be collected for a better final decision. This extension will allow fishermen currently using Parker TEDs to continue to do so and will give more time for testing additional modifications. The small number of fishermen using Parker TEDs and the apparently high effectiveness of the Parker TED mean that this extension will not unnecessarily impact sea turtles.

Request for Comments

NMFS is requesting input and will accept written comments (see ADDRESSES) on this interim final rule until December 13, 1999. Any comments, suggestions, or additional data and information on this action will be taken into consideration before a final determination is made on a final rule.

Classification

This action has been determined to be not significant for purposes of Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA (AA), finds that good cause exists, under 5 U.S.C. 553(b)(B), to waive prior notice and an opportunity for public comment on this rule. It is impracticable and contrary to the public interest to provide prior notice and opportunity for comment because the shrimp fishery is currently underway in the offshore and eastern Gulf of Mexico with virtually all of those shrimp trawlers required to use TEDs. The provisions of this rule allow those fishermen the continued option of a soft TED design, to comply with the TED requirement. In addition, a small number of fishermen are presently using the Parker TED. This rule will allow those fishermen to continue to use their existing gear beyond October 12, 1999. Otherwise, they would be forced to remove their soft TEDs by that date and replace them with hard TEDs. Because this final rule does not create any new regulatory burden, but instead relieves regulatory restrictions by continuing an additional option for complying with existing sea turtle conservation requirements, under 5 U.S.C. 553(d)(1) it is not subject to a 30-day delay in effective date.

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other

law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are inapplicable.

The AA prepared an EA/RIR for the April 13, 1998, interim final rule (63 FR 17948) that approved the use of the Parker TED. The EA concluded that the rule will have no significant impact on the human environment. A copy of the EA/RIR is available (see ADDRESSES).

List of Subjects in 50 CFR Part 223

Endangered and threatened species, Exports, Imports, Marine mammals, Transportation.

Dated: October 7, 1999.

Andrew A. Rosenberg,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 223 is amended as follows:

PART 223—THREATENED MARINE AND ANADROMOUS SPECIES

1. The authority citation for part 223 continues to read as follows:

Authority: 16 U.S.C. 1531 - 1543; subpart B, § 223.12 also issued under 16 U.S.C. 1361 *et seq.*

§ 223.207 [Amended]

2. In § 223.207, paragraph (c) introductory text, remove the text "October 13, 1999" and add in its place, "October 13, 2000".

BILLING CODE 3510-22-F

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 990304063-9063-01; I.D. 100699B]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock by Vessels Catching Pollock for Processing by the Inshore Component in the Bering Sea Subarea

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock by vessels catching pollock for processing by the inshore component in the Bering Sea subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is

necessary to prevent exceeding the 1999 pollock total allowable catch (TAC) specified to the inshore component in the Bering Sea subarea of the BSAI.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.) October 6, 1999, until 2400 hrs, A.l.t., December 31, 1999.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

In accordance with section 206(b)(1) of the American Fisheries Act (AFA), 50 percent of the remainder of the pollock TAC in the BSAI, after the subtraction of the allocation to the pollock Community Development Quota and the subtraction of allowances for the incidental catch of pollock by vessels harvesting other groundfish species, shall be allocated as a directed fishing allowance to catcher vessels harvesting pollock for processing by the inshore component. Pursuant to the AFA, the final 1999 amount of pollock allocated as a directed fishing allowance for processing by the inshore component of the Bering Sea subarea is 423,187 metric tons (64 FR 12103, March 11, 1999).

In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance soon will be reached. Consequently, NMFS is prohibiting directed fishing for pollock by vessels catching pollock for processing by the inshore component in the Bering Sea subarea of the BSAI.

Maximum retainable bycatch amounts may be found in the regulations at § 679.20(e) and (f).

Classification

This action responds to the best available information recently obtained from the fishery. It must be implemented immediately in order to prevent exceeding the final 1999 pollock TAC specified to the inshore component in the Bering Sea subarea of the BSAI. A delay in the effective date is impracticable and contrary to the public interest. NMFS finds for good cause that the implementation of this action cannot be delayed for 30 days. Accordingly, under 5 U.S.C. 553(d), a

delay in the effective date is hereby
waived.

This action is required by § 679.20
and is exempt from review under E.O.
12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 6, 1999.

Bruce C. Morehead,

*Acting Director, Office of Sustainable
Fisheries, National Marine Fisheries Service.*
