SUPPLEMENTARY INFORMATION:

Purpose

The Environmental Protection Agency leads the Mississippi River/Gulf of Mexico Watershed Nutrient Task Force consisting of Federal, State, and Tribal members. The Task Force has accepted the responsibility to develop an Action Plan, based on the Integrated Assessment and other information, for reducing, mitigating, and controlling hypoxia in the northern Gulf of Mexico. The Action Plan is required by section 604(b) of Public Law 105-383.

Status

The Integrated Assessment, as required in section 604(a) of Public Law 105-383, examines the distribution, dynamics, and causes of hypoxia; ecological and economic consequences; sources and loads of nutrients transported by the Mississippi River to the Gulf of Mexico; effects of reducing nutrient loads; methods for reducing nutrient loads; and the social and economic costs and benefits of such methods.

Six topical reports, each covering one of the aspects listed above, were prepared by teams of scientists. Each of the reports underwent extensive peer review by independent scientific experts. These reports, along with the public comment on them, were considered in developing the Integrated Assessment. (See 64 FR 23834-23835 dated May 4, 1999.)

The Integrated Assessment, as well as the six topical reports and the public comments, may be reached via either the EPA or NOAA/NOS websites: at <<http://www.epa.gov/msbasin/>> or <http://www.nos.noaa.gov/Products/pubs_hypox.html>; or contact those listed above for information on how to obtain the reports.
