SUPPLEMENTARY INFORMATION:

I. Abstract

In 2000, NIST will perform evaluations of Communicator implementations, as part of the Defense Advanced Research Project Agency (DARPA) Communicator program. Using the Communicator involves task-based spoken dialogue with the system. The evaluations that are to be performed are intended to achieve three goals. First, to help implementors of Communicator programs to identify the successes and weaknesses of their implementations. Second, to enable the research sponsors to identify and measure progress in order to assess the success of the program. Third, to advance the state of research knowledge about metrics and evaluation of task-based dialogue systems. The proposed evaluations will be performed with paid research subjects, who will each use the implementations to perform tasks representative of the tasks that Communicator systems are intended to perform. As part of the evaluation, the paid research subjects will be asked to respond to a user questionnaire that is intended to assess the subjects' user-satisfaction and their subjective opinions about various aspects of each system that are being objectively measured. The subjects are being paid to complete the questionnaire, and they will not be paid if they do not complete the questionnaire.

The user-questionnaire will enable us to study correlations of various objective metrics with the users' satisfaction and the users' subjective opinions.

II. Method of Collection

Most questions will be Likert-scale type items (items consisting of a statement with the requested response being a choice on a scale running from "fully agree" through "fully disagree"). We anticipate that the research subject users will read and respond to the questions on paper or else by using a web browser.

III. Data

OMB Number: None.

Form Number: None.

Type of Review: Regular submission.

Affected Public: The research subjects (who will be adult persons, with any American accent and no speech impediment, who are familiar with the task domain).

Estimated Number of Respondents: 360.

Estimated Time per Response: Less than 10 minutes per questionnaire.

Estimated Total Annual Burden Hours: 60 Hours.

Estimated Total Annual Cost to the Public: \$0 (no capital expenditures required).

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to the notice will be summarized and/or included in the request for OMB approval of the information collection; they also will become a matter of public record.
