## DEPARTMENT OF THE INTERIOR

### National Park Service

#### Federal Land Managers' Air Quality Related Values Work Group (FLAG)

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** The National Park Service, in cooperation with the U.S. Fish and Wildlife Service and the U.S. Department of Agriculture Forest Service, is announcing the availability of, and accepting comments on, the draft FLAG Phase I Report.

The Federal Land Managers' Air Quality Related Values Work Group (FLAG) was formed to develop a more consistent approach for the Federal Land Managers (FLMs), *i.e.*, National Park Service, U.S. Fish and Wildlife Service, and U.S. Department of Agriculture Forest Service, to evaluate air pollution effects on their resources. The FLAG effort focuses on the effects of the air pollutants that could affect the health and status of resources in areas managed by the three agencies, primarily such pollutants as ozone, particulate matter, nitrogen dioxide, sulfur dioxide, nitrates, and sulfates. In Phase I, FLAG formed subgroups that concentrated on four issues: (1) terrestrial effects of ozone; (2) aquatic and terrestrial effects of wet and dry pollutant deposition; (3) visibility; and (4) process and policy issues. The draft report contains issue-specific technical and policy analyses, recommendations for evaluating air quality related values, and guidelines for completing and evaluating new source review permit applications. These recommendations and guidelines are intended for use by the FLMs, permitting authorities, permit applicants, and other interested parties.

**DATES:** Written comments on the FLAG report must be received by January 7, 2000.

The FLMs will conduct a public meeting to discuss the FLAG report on December 15, 1999, from 8:00 a.m. to 5:00 p.m. at the Holiday Inn Lakewood, 7390 W. Hampden Avenue, Lakewood, CO 80227; (303) 980-9200. The meeting agenda is as follows: 8:00 a.m. to 10:00 a.m.—Process and Policy Issues, 10:00 a.m. to 12:00 noon—Visibility Issues, 1:00 p.m. to 3:00 p.m.—Ozone Issues, and 3:00 p.m. to 5:00 p.m.—Deposition Issues. Each session will include a 30-minute overview of the FLAG recommendations, followed by one and one-half hours for questions and discussion. To aid in meeting planning, please contact John Bunyak at the address below if you plan to attend the public meeting.

**ADDRESSES:** A copy of the draft FLAG Phase I Report can be obtained from John Bunyak or downloaded from the Internet at: <http://www.aqd.nps.gov/ard/flagfree/> Mail comments to: John Bunyak, Air Resources Division, National Park Service, P.O. Box 25287, Denver, Colorado, 80225. E mail comments can be sent to [john\\_bunyak@nps.gov](mailto:john_bunyak@nps.gov).

**FOR FURTHER INFORMATION CONTACT:** John Bunyak at the above address or by calling (303) 969-2818.

Dated: October 25, 1999.

**John Bunyak,**

*Acting, Chief, Air Resources Division.*

## INTERNATIONAL TRADE COMMISSION

### Investigation No. TA-201-70

#### Circular Welded Carbon Quality Line Pipe

**AGENCY:** United States International Trade Commission.

**ACTION:** Amendment of scope of the investigation to exclude certain merchandise described as arctic-grade line pipe.

**SUMMARY:** On October 28, 1999, the Commission, at the request of petitioners in the investigation, amended the scope of investigation No. TA-201-70, Circular Welded Carbon Quality Line Pipe, to remove from the scope of investigation certain merchandise described as arctic-grade line pipe, defined as follows—

welded line pipe that (1) Has an outer diameter of 4.5 inches or more and a wall thickness equal to or less than 0.75 inches; and (2) When subjected to a Charpy V-notch test performed at minus 50 degrees

Fahrenheit or below applied to three specimens taken from the well area, has a ft-lbs rating of no less than 17 ft-lbs for each sample, with an average for all three at no less than 19 ft-lbs; and (3) Using at least three samples, has a minimum average shear area of 85 percent in the base metal and 50 percent in the weld; and (4) When subjected to a hydrogen induced cracking test to be performed as per NACE (National Association of Corrosion Engineers) TM0284 test with solution A, has a crack length ratio that does not exceed 15 percent, a crack sensibility ratio that does not exceed 2 percent, and a crack thickness ratio that does not exceed 5 percent.

The Commission action amending the scope was taken prior to the vote in the injury phase of the investigation, which also occurred on October 28, 1999.

Accordingly, imports of such line pipe were not part of the Commission's affirmative injury determination made later that day.<sup>1</sup> Notice of institution of the investigation was published in the **Federal Register** of August 4, 1999 (64 F.R. 42414).

**EFFECTIVE DATE:** October 28, 1999.

**FOR FURTHER INFORMATION CONTACT:** Valerie Newkirk (202-205-3190), Office of Investigations, U.S. International Trade Commission, 500 E Street, SW, Washington, DC 20436.

Issued: November 2, 1999.

By order of the Commission.

**Donna R. Koehnke,**

*Secretary.*

## INTERNATIONAL TRADE COMMISSION

[Investigation No. 701-TA-224 (Review)]

### Live Swine From Canada

**AGENCY:** United States International Trade Commission.

**ACTION:** Termination of five-year review.

**SUMMARY:** On October 29, 1999, the Department of Commerce released its negative final determination of the likelihood of continuation or recurrence of a countervailable subsidy in connection with the subject five-year review. Accordingly, pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. § 1675(c)), the five-year review of the countervailing duty order concerning live swine from Canada (investigation No. 701-TA-224 (Review)) is terminated.

**EFFECTIVE DATE:** October 29, 1999.

**FOR FURTHER INFORMATION CONTACT:** Karen Taylor (202-708-4101), Office of

<sup>1</sup> Commissioner Carol T. Crawford made a negative determination.
