50 CFR Part 648

[Docket No. 990318076–9109–02; I.D. 110499A]

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Commercial Haddock Harvest

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Increase of haddock landing limit.

SUMMARY: NMFS announces that less than 75 percent of the haddock target total allowable catch (TAC) will be harvested (4,218.5 mt) for the 1999 fishing year under the present landing limit. Therefore, the Regional Administrator, Northeast Region, NMFS (Regional Administrator) is increasing the landing limit. As of 0001 hours November 5, 1999, vessels fishing under a multispecies day-at-sea (DAS) may land up to 5,000 lb (2,268 kg) per DAS, 50,000 lb (22,680 kg) per trip maximum, for any DAS utilized on or after November 5, 1999. This action provides the industry with the opportunity to harvest at least 75 percent of the target TAC for the 1999 fishing year.

DATES: Effective from 0001 hours, November 5, 1999, through 2400 hours, April 30, 2000.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, Fishery Policy Analyst, 978–281–9273.

SUPPLEMENTARY INFORMATION: Regulations implementing the haddock

trip limit in Framework Adjustment 27 (64 FR 24066, May 5, 1999) became effective May 1, 1999. To ensure that haddock landings remain within the target TAC of 5,600 mt established for the 1999 fishing year, Framework 27 established an initial landing limit of 2,000 lb (907.2 kg) per day and 20,000 lb (9,071.8 kg) per trip maximum. Framework 27 also provided a mechanism to increase or decrease the haddock trip limit based upon the percentage of TAC which is projected to be harvested. Section 648.86(a)(1)(iii) specifies that if the Regional Administrator has projected that less than 75 percent of the haddock target TAC (4,218.5 mt) will be harvested for the 1999 fishing year the landing limit may be increased. Further, this section stipulates that NMFS will publish a notification in the **Federal Register** informing the public of the date of any increase or decrease.

Based on the available information, the Regional Administrator has projected that less than 4,218.5 mt of haddock will be harvested by April 30, 2000, under the existing landing limit. The Regional Administrator has determined that increasing the haddock landing limit to 5,000 lb (2,268 kg) per DAS, 50,000 lb (22,680 kg) per trip maximum, is justified because it provides the industry with the opportunity to harvest at least 75 percent of the target TAC for the 1999 fishing year. Therefore, the Regional Administrator, under § 648.86(a)(1)(iii), has increased the haddock landing limit to 5,000 lb (2,268 kg) per DAS, 50,000 lb (22,680 kg) per trip maximum, for DAS used on or after 0001 hours, November 5, 1999, through 2400 hours, April 30, 2000.
