Food and Drug Administration

[Docket No. 99D-4487]

Medical Devices; Draft Guidance for Conducting Stability Testing to Support an Expiration Date Labeling Claim for Medical Gloves; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the draft guidance entitled "Guidance for Conducting Stability Testing to Support an Expiration Date Labeling Claim for Medical Gloves." This guidance is neither final nor is it in effect at this time. This guidance describes the information needed to support an expiration date labeling claim for

powdered or powder-free, surgeon's or patient examination gloves. Expiration dating of medical gloves is voluntary at this time. FDA recommends that manufacturers, repackagers, or importers who add an expiration date labeling claim follow the enclosed recommended criteria and protocols for conducting testing described in this guidance.

DATES: Written comments concerning this draft guidance must be received by February 14, 2000.

ADDRESSES: See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the draft guidance. Submit written requests for single copies on a 3.5" diskette of the guidance document entitled, "Guidance for Conducting Stability Testing to Support an Expiration Date Labeling Claim for Medical Gloves" to the Division of Small Manufacturers Assistance (HFZ-220), Center for Devices and Radiological Health, Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send two self-addressed adhesive labels to assist that office in processing your request, or fax your request to 301-443-8818. Written comments concerning this guidance must be submitted to the Dockets Management Branch, (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Chiu S. Lin, Center for Devices and Radiological Health (HFZ-480), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301-443-8913.

SUPPLEMENTARY INFORMATION:

I. Background

It is estimated that millions of health care workers use medical gloves on a daily basis as a barrier against blood borne pathogens and microorganisms. The effective use of medical gloves as a barrier, however, is dependent upon the integrity of the glove material. Degradation of the glove material may occur when exposed to various types of manufacturing processes (e.g., chlorination) and/or environmental conditions.

In response to growing concerns regarding the use of natural rubber latex (NRL), the National Institute of Occupational Safety and Health recently issued a safety alert recommending the use of powder-free medical gloves as a means to reduce exposure to natural
