SUPPLEMENTARY INFORMATION: *Title:* NSPS Subpart RR—Pressure Sensitive Tape and Label Surface Coating Operations (OMB Control No. 2060-0004; EPA ICR No. 0658.07; Expiration January 31, 2000). This review request is for an extension of a currently approved collection.

Abstract: Owners or operators of the affected facilities described must make one-time-only notifications. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements specific to New Source Performance Standards—Subpart RR for Pressure Sensitive Tape and Label Surface Coating Operations provide EPA with information on the operation of the emission control device and compliance with the volatile organic compound (VOC) standard. Quarterly reports of excess emissions are required. These notifications, reports, and records are essential in determining compliance;

and are required, in general, of all sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least 2 years following the date of such solvent content and temperature measurements, excess emission reports, and records of coatings and solvents used.

Approximately 410 sources are currently subject to the standard, and it is estimated that an additional 10 sources per year will become subject to the standard in the next three years. All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 06/04/1999 (64 FR 30011); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 38 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Estimated Number of Respondents: 410.

Frequency of Response: Initially, quarterly and semi-annually.

Estimated Total Annual Hour Burden: 39,104 hours.
