

Register notices separate from those used for other records disposition schedules.

DATES: Requests for copies must be received in writing on or before January 3, 2000. On request, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums concerning a proposed schedule. These, too, may be requested. Requesters will be given 30 days to submit comments.

Some schedules submitted in accordance with NARA Bulletin 99-04 group records by program, function, or organizational element. These schedules do not include descriptions at the file series level, but, instead, provide citations to previously approved schedules or agency records disposition manuals (see **SUPPLEMENTARY INFORMATION** section of this notice). To facilitate review of such disposition requests, previously approved schedules or manuals that are cited may be requested in addition to schedules for the electronic copies. NARA will provide the first 100 pages at no cost. NARA may charge \$.20 per page for additional copies. These materials also may be examined at no cost at the National Archives at College Park (8601 Adelphi Road, College Park, MD).

ADDRESSES: To request a copy of any records schedule identified in this notice, write to the Life Cycle Management Division (NWML), National Archives and Records Administration (NARA), 8601 Adelphi Road, College Park, MD 20740-6001. Requests also may be transmitted by FAX to 301-713-6852 or by e-mail to records.mgt@arch2.nara.gov.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports and/or copies of previously approved schedules or manuals should so indicate in their request.

FOR FURTHER INFORMATION CONTACT: Marie Allen, Director, Life Cycle Management Division (NWML), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. Telephone: (301) 713-7110. E-mail: records.mgt@arch2.nara.gov.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA approval, using the

Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs the records to conduct its business. Routine administrative records common to most agencies are approved for disposal in the General Records Schedules (GRS), which are disposition schedules issued by NARA that apply Government-wide.

In the past, NARA approved the disposal of electronic copies of records created using electronic mail and word processing via General Records Schedule 20, Items 13 (word processing documents) and 14 (electronic mail). However, NARA has determined that a different approach to the disposition of electronic copies is needed. In 1998, the Archivist of the United States established an interagency Electronic Records Work Group to address this issue and pursuant to its recommendations, decided that agencies must submit schedules for the electronic copies of program records and administrative records not covered by the GRS. On March 25, 1999, the Archivist issued NARA Bulletin 99-04, which tells agencies what they must do to schedule electronic copies associated with previously scheduled program records and certain administrative records that were previously scheduled under GRS 20, Items 13 and 14.

Schedules submitted in accordance with NARA Bulletin 99-04 only cover the electronic copies associated with previously scheduled series. Agencies that wish to schedule hitherto unscheduled series must submit separate SF 115s that cover both recordkeeping copies and electronic copies used to create them.

In developing SF 115s for the electronic copies of scheduled records, agencies may use either of two scheduling models. They may add an appropriate disposition for the electronic copies formerly covered by GRS 20, Items 13 and 14, to every item in their manuals or records schedules where the recordkeeping copy has been created with a word processing or electronic mail application. This approach is described as Model 1 in Bulletin 99-04. Alternatively, agencies may group records by program, function, or organizational component and propose disposition instructions for the electronic copies associated with each grouping. This approach is described as Model 2 in the Bulletin. Schedules that follow Model 2 do not describe records at the series level.

For each schedule covered by this notice the following information is provided: name of the Federal agency and any subdivisions requesting disposition authority; the organizational unit(s) accumulating the records or a statement that the schedule has agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency; the control number assigned to each schedule; the total number of schedule items; the number of temporary items (the record series proposed for destruction); a brief description of the temporary electronic copies; and citations to previously approved SF 115s or printed disposition manuals that scheduled the recordkeeping copies associated with the electronic copies covered by the pending schedule. If a cited manual or schedule is available from the Government Printing Office or has been posted to a publicly available Web site, this too is noted.

Further information about the disposition process is available on request.

Schedules Pending

1. Department of Labor, Employees' Compensation Appeals Board (N9-86-00-01, 4 items, 4 temporary items). Electronic copies of records created using electronic mail and word processing that relate to official dockets, docket appellant indexes and logs, general administrative files, and the annual digest and decisions of the Board, which is published by the Government Printing Office. This schedule follows Model 1 as described in the **SUPPLEMENTARY INFORMATION** section of this notice. Recordkeeping copies of these files are included in Disposition Job No. NC1-386-81-1.

Dated: November 8, 1999.

Michael J. Kurtz,

*Assistant Archivist for Record Services—
Washington, DC.*

BILLING CODE 7535-01-M

NUCLEAR REGULATORY COMMISSION

Commonwealth Edison Co.; Notice of Partial Denial of Amendment to Facility Operating License and Opportunity for Hearing

[Docket No. 50-373]

The U.S. Nuclear Regulatory Commission (the Commission) has partially denied a request by

Commonwealth Edison Company (ComEd, the licensee), for an amendment to Facility Operating License No. NPF-11 issued to ComEd for operation of LaSalle County Station, Unit 1, located in LaSalle County, Illinois. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on August 11, 1999 (64 FR 43768).

The purpose of the licensee's amendment request was to revise Technical Specification (TS) Section 2.1 to reflect a change to the Minimum Critical Power Ratio and to add an NRC-approved Siemens Power Corporation methodology to the list of topical reports used to determine the core operating limits.

The NRC staff has concluded that the portion of the licensee's request to add a methodology to the list of topical reports in Section 6.6 of the TS can not be granted. The basis for the partial denial is detailed in the Safety Evaluation related to Amendment No. 137 dated November 9, 1999.

By December 16, 1999, the licensee may demand a hearing with respect to the partial denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to Ms. Pamela Stroebel, Commonwealth Edison Company, PO Box 767, Chicago, Illinois 60690-0767.

For further details with respect to this action, see (1) the application for amendment dated July 7, 1999, as supplemented on October 14, 1999, and (2) Amendment No. 137 to Facility Operating License No. NPF-11, and (3) the Commissions related Safety Evaluation.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, or are accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

Dated at Rockville, Maryland, this 9th day of November, 1999.

For the Nuclear Regulatory Commission.

Anthony J. Mendiola,

Acting Director, Project Directorate III, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8778]

Notice of Consideration of Amendment Request for Molycorp, Washington, Pennsylvania and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to Source Material License No. SMB-1393 issued to Molycorp, Inc. (the licensee), to authorize decommissioning of its former processing facility in Washington, Pennsylvania.

The licensee initially submitted a Site Decommissioning Plan (SDP) for the Washington, PA, facility on August 14, 1995. Decommissioning criteria in effect at the time the SDP was submitted were contained in NRC's "Action Plan to Ensure Timely Clean up of Site Decommissioning Management Plan Sites" (Action Plan) (57 FR 13389 dated April 16, 1992). The SDP proposed a modification to the Action Plan criteria for application at the Washington facility. Contaminated portions of the facility would be remediated to this modified criteria and be disposed of in a disposal cell on another portion of Molycorp's property. NRC subsequently published its license termination rule (Radiological Criteria for License Termination (LTR), 10 CFR part 20 subpart E) in 1997. The LTR allows a "grandfathering" period (10 CFR 20.1401(b)(3)) for licensees proposing Action Plan criteria in SDPs submitted prior to August 20, 1998. In a letter dated February 16, 1999, NRC staff informed Molycorp that because the criteria proposed in the 1995 SDP were not consistent with the Action Plan, the conditions that would permit remediation of certain areas of the site on a grandfathered basis had not been met. On June 1, 1999, the licensee proposed that the SDP would be resubmitted in two parts, with Part 1 pertaining to remediation in accordance with Action Plan criteria and Part 2 detailing the disposition of materials that exceed levels in the Action Plan. A meeting was held between NRC staff and Molycorp on June 15, 1999, to discuss this matter. At this meeting, NRC stated that if a revised SDP,
