

I. The July 19, 1999 Interim Rule

On July 19, 1999 (64 FR 38812), HUD published an interim rule that clarified the level of expenditure documentation that Community Development Block Grant (CDBG) grantees and subrecipients must maintain to identify the use of CDBG funds provided for assisted activities. The lack of appropriate documentation increases the potential for misuse of CDBG funds. The change made by the July 19, 1999 interim rule provides the public with more assurance that CDBG funds are used only for allowable purposes.

OMB Uniform Administrative Requirements for grants to local governments and nonprofit organizations have long required that grantees and subrecipients maintain records which adequately identify the source and application of funds provided for financially-assisted activities. This requirement is found at 24 CFR 85.20(b)(2) for local governments and at 24 CFR 84.21(b)(2) for nonprofit organizations. These requirements are specifically made applicable to the CDBG program by 24 CFR 570.502(a)(4) and 24 CFR 570.502(b)(3), respectively. The CDBG regulations at § 570.506(h) also require maintaining financial records in accordance with the applicable requirements listed in § 570.502.

The interim rule amended § 570.506(h) to clarify the level of documentation that is needed for grantees and subrecipients to demonstrate compliance with the existing financial management requirements in 24 CFR parts 84 and 85 relating to maintaining adequate records to identify the use of funds provided for assisted activities. A broad range of types of documentation is described in an effort to reflect the myriad of different activities and financing mechanisms that can be undertaken with CDBG funds.

The preamble to the July 19, 1999 interim rule provides additional details regarding the amendment to HUD's CDBG program regulations at § 570.506(h).

II. Discussion of Public Comment Received on the July 19, 1999 Interim Rule

The public comment period on the July 19, 1999 interim rule closed on September 17, 1999. By close of business on that date, HUD had received a single public comment on the interim rule. The public commenter expressed support of the interim regulatory amendment. The commenter wrote that "[g]rantees should not have difficulty

maintaining evidence to support how CDBG funds provided to for-profit entities are expended." Accordingly, HUD has adopted the amendments made by the interim rule without change.

III. Findings and Certifications

Paperwork Reduction Act Statement

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), and assigned OMB control number 2506–0077. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a valid control number.

Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed and approved this final rule, and in so doing certifies that this rule will not have a substantial economic impact on small entities. This final rule will have no economic impact on small entities since it is a clarification of existing policy.

Environmental Impact

This amendment is categorically excluded from environmental review under the National Environmental Policy Act (42 U.S.C. 4321). In keeping with the exclusion provided for in 24 CFR 50.19(c)(1), this amendment does not direct, provide for assistance or loan and mortgage insurance for, or otherwise govern or regulate, real property acquisition, disposition, leasing, rehabilitation, alteration, demolition, or new construction; or establish, revise, or provide for standards for construction or construction materials, manufactured housing, or occupancy. Accordingly, under 24 CFR 50.19(c)(2), this amendment is categorically excluded because it amends an existing document where the existing document as a whole would not fall under the exclusion in 24 CFR 50.19 (c)(1), but the amendment by itself would do so.

Executive Order 13132, Federalism

Executive Order 13132 (entitled "Federalism") prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial direct compliance costs on State and local governments and is not required by statute, or the rule preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This

final rule does not have federalism implications and does not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive Order.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance numbers for the Community Development Block Grants program are 14.218, 14.219, 14.225, 14.227, 14.246, and 14.248.

List of Subjects in 24 CFR Part 570

Administrative practice and procedure, American Samoa, Community development block grants, Grant programs—education, Grant programs—housing and community development, Guam, Indians, Lead poisoning, Loan programs—housing and community development, Low and moderate income housing, New communities, Northern Mariana Islands, Pacific Islands Trust Territory, Pockets of poverty, Puerto Rico, Reporting and recordkeeping requirements, Small cities, Student aid, Virgin Islands.

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

Accordingly, the interim rule amending 24 CFR part 570, which was published at 64 FR 38812 on July 19, 1999, is adopted as a final rule without change.

Dated: November 16, 1999.

Cardell Cooper,

Assistant Secretary for Community Planning and Development.

[FR Doc. 99–30366 Filed 11–19–99; 8:45 am]

BILLING CODE 4210–29–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

[SPATS No. IN–143–FOR; State Program Amendment No. 98–5]

Indiana Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is approving an amendment to the Indiana regulatory program (Indiana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Indiana proposed revisions to rules

concerning revegetation standards for success for nonprime farmland for surface and underground coal mining and reclamation operations under Indiana Code (IC) 14-34. Indiana intends to revise its program to be consistent with the corresponding Federal regulations.

EFFECTIVE DATE: November 22, 1999.

FOR FURTHER INFORMATION CONTACT:

Andrew R. Gilmore, Director, Indianapolis Field Office, Office of Surface Mining, Minton-Capehart Federal Building, 575 North Pennsylvania Street, Room 301, Indianapolis, Indiana 46204-1521. Telephone (317) 226-6700. Internet: INFOMAIL@indgw.osmre.gov.

SUPPLEMENTARY INFORMATION:

- I. Background on the Indiana Program
- II. Submission of the Proposed Amendment
- III. Director's Findings
- IV. Summary and Disposition of Comments
- V. Director's Decision
- VI. Procedural Determinations

I. Background on the Indiana Program

On July 29, 1982, the Secretary of the Interior conditionally approved the Indiana program. You can find background information on the Indiana program, including the Secretary's findings, the disposition of comments, and the conditions of approval in the July 26, 1982, **Federal Register** (47 FR 32107). You can find later actions on the Indiana program at 30 CFR 914.10, 914.15, 914.16, and 914.17.

II. Submission of the Proposed Amendment

By letter dated August 2, 1999 (Administrative Record No. IND-1664), Indiana sent us an amendment to its program under SMCRA. This amendment replaces State Program Amendment No. 95-2, which we approved in the May 30, 1995, **Federal Register** (60 FR 28069). Indiana sent the amendment, which amends the Indiana Administrative Code (IAC), at its own initiative.

We announced receipt of the amendment in the August 16, 1999, **Federal Register** (64 FR (44448)). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the adequacy of the amendment. The public comment period closed on September 25, 1999. Because no one requested a public hearing or meeting, we did not hold one.

III. Director's Findings

Following, under SMCRA and the Federal regulations at 30 CFR 732.15

and 732.17, are our findings concerning the amendment.

A. Withdrawal of Previously Approved Amendment

Indiana notified us in its letter dated July 24, 1997 (Administrative Record No. IND-1670), that the statutory time frame for approving State Program Amendment No. 95-2 had expired prior to final approval. We approved this amendment, dated May 3, 1995 (Administrative Record No. IND-1460), on September 14, 1995 (60 FR 47692). Since Indiana did not adopt the amendment, we are removing our approval and amending 30 CFR 914.15 to reflect this decision.

B. 310 IAC 12-5-64.1 (Surface) and 12-5-128.1 (Underground) Revegetation Standards for Success for Nonprime Farmland

Since the revisions proposed for surface mining at § 12-5-64.1(c) are identical to those being proposed for underground mining at § 12-5-128.1(c), they will be combined for ease of discussion. These subsections provide the standards for success which are to be applied under the approved postmining land uses.

1. Organizational and Reference Changes

Indiana proposed paragraph notation changes to reflect the organizational changes made throughout subsections (c). Additionally, Indiana proposed revisions throughout subsections (c) to correct the reference to the "Soil Conservation Service" to the "Natural Resources Conservation Service."

We find that the organizational and reference changes do not render the Indiana regulations at 310 IAC 12-5-64.1/128.1 less effective than the Federal regulations at 30 CFR 816.116/817.116.

2. Redesignations

Indiana proposed to redesignate existing subsections (c)(5), (c)(6), (c)(7), and (c)(8) as subsections (c)(4), (c)(5), (c)(6), and (c)(7), respectively. We find that the proposed redesignations do not render the Indiana regulations at 310 IAC 12-5-64.1/128.1 less effective than the Federal regulations at 30 CFR 816.116/817.116.

3. Relocation of Existing Provisions

Indiana proposed to delete the provisions at existing subsections (c)(4) and redesignated subsections (c)(6). These provisions require that if current Natural Resources Conservation Service predicted yield by soil map units are used to determine production of living

plants, then the standard for success shall be a weighted average of the predicted yields for each unmined soil type which existed on the permit areas at the time the permit was issued. Indiana proposed to relocate these provisions to existing subsections (c)(3)(B) and redesignated subsections (c)(5)(B).

Indiana also proposed to delete the provisions at redesignated subsections (c)(6) which require that once the method for establishing the standards has been selected, it may not be modified without the approval of the director of IDNR. Indiana proposed to relocate these provisions to redesignated subsections (c)(5)(E).

We find that Indiana's relocation of these provisions does not render the Indiana regulations less effective than the Federal regulations and are approving the modifications.

4. Subsections (c)(3)(C), Pastureland Production Success Standards Methodology

Indiana proposed to delete the language in existing subsections (c)(3)(C) for determining production of living plants on pastureland and replace it with the following:

(C) A target yield determined by the following formula: Target Yield = NRCS Target Yield × (CCA/10 Year CA) where: NRCS Target Yield = the average yield per acre, as predicted by the Natural Resources Conservation Service, for the crop and the soil map units being evaluated. The most current yield information at the time of permit issuance shall be used, and shall be contained in the appropriate sections of the permit application. CCA = the county average for the crop for the year being evaluated as reported by the United States Department of Agriculture crop reporting service, the Indiana Agricultural Statistics Service. 10 Year CA = the ten (10) Year Indiana Agricultural Statistics Service county average, consisting of the year being evaluated and the nine (9) preceding years.

The Federal regulations at 30 CFR 816/817.116(a)(2) require standards for success to include criteria representative of unmined lands in the area being reclaimed to evaluate the appropriate vegetation parameters of ground cover, production, or stocking. As discussed in the May 29, 1992, **Federal Register** (57 FR 22655), Indiana's average county yield data contains data of yields from previously mined lands. In letters dated February 26, 1992 (Administrative Record No. IND-1036 and IND-1037), OSM asked Indiana to clarify the use of this data. In letters dated March 20, 1992 (Administrative Record No. IND-1051 and IND-1052), Indiana stated that the amount of previously mined acreage

being farmed is so limited that the inclusion of these yields essentially has no impact upon the overall yields calculated for the county average. Indiana also stated that it used the average county yield data as a weather correction factor applied to predicted soil mapping unit yields.

In the May 29, 1992, **Federal Register** (57 FR 22655, finding No. 1.c.), we found that the use of the Indiana average county yield data as the sole standard for determining success of revegetation would be less effective than the Federal regulations at 30 CFR 816/817.116(a)(2). However, we found that the use of Indiana's average county yield data as a correction factor would not be inconsistent with the Federal regulations.

The currently proposed methodology is an acceptable way to calculate production standards for non-prime farmland pastureland. This method adjusts the weighted production standard based on soil type by using a factor derived by the county average and an average of the historical county average. The weighted production standard is already approved in the Indiana program and the adjustment of this standard by county average data is reasonable. Thus, we find that the proposed method for calculating success standards on nonprime farmland pasture at 310 IAC 12-5-64.1/128.1(c)(3)(C) is no less effective than the Federal requirements for success standards at 30 CFR 816/817.116(a)(2).

5. Subsections (c)(3)(D) and (c)(5)(D), Other Success Standards

Indiana proposed to add subsections (c)(3)(D) and (c)(5)(D) to allow other methods approved by the director of the Indiana Department of Natural Resources (IDNR) to be used in determining success of production of living plants on revegetated nonprime farmland pasture land. This language has the same meaning as the language Indiana deleted at subsections (c)(3)(C) and (c)(5)(C). We previously approved the provisions at (c)(3)(C) and (c)(5)(C) on May 29, 1992 (57 FR 22655), with the understanding that Indiana will request our approval of other methods before using them in the Indiana program. By letters dated March 20, 1992 (Administrative Record No. IND-1051 and IND-1052), Indiana stated the IDNR will request OSM's approval for other standards prior to their use in the Indiana program if they vary significantly from the approved standards. Because the addition of the provisions at subsections (c)(3)(D) and (c)(5)(D) does not substantially change

the approved Indiana program, we are approving them.

6. Subsections (c)(5)(C), Cropland Production Success Standards Methodology

At redesignated subsections (c)(5)(C), Indiana proposed to delete the existing language for determining production of living plants on cropland and replace it with the following:

(C) A target yield determined by the following formula: Target Yield = CCA × (NRCSP/NRCSC) where: CCA = the county average for the crop for the year being evaluated as reported by the United States Department of Agriculture crop reporting service, the Indiana Agricultural Statistics Service. NRCSP = the weighted average of the current Natural Resources Conservation Service predicted yield for each croppable, unmined soil which existed on the permit at the time the permit was issued. NRCSC = the weighted average of the current Natural Resources Conservation Service predicted yield for each croppable, unmined soil which is shown to exist in the county on the most current county soil survey. A croppable soil is any soil which the Natural Resources Conservation Service has defined as being in capability class I, II, III, or IV.

The Federal regulations at 30 CFR 816/817.116(a)(2) require that standards for success shall include criteria representative of unmined lands in the area being reclaimed to evaluate the appropriate vegetation parameters of ground cover, production, or stocking. The above discussion in finding No. B.4, pertaining to Indiana's average county yield data containing data of yields from previously mined lands is also relevant to this proposed revision. As discussed in finding No. B.4, we had previously found that the use of Indiana's average county yield data as a correction factor was not inconsistent with the Federal regulations.

Indiana's currently proposed methodology would modify the county average by a factor that uses the NRCS predicted standard for permitted unmined soils and an NRCS predicted standard that excludes mined land. Therefore, we are approving the provisions proposed at 310 IAC 12-5-64.1/128.1(c)(5)(C).

IV. Summary and Disposition of Comments

Public Comments

OSM requested public comments on the proposed amendment, but did not receive any.

Federal Agency Comments

Under 30 CFR 732.17(h)(11)(i), we requested comments on the amendment from various Federal agencies with an actual or potential interest in the

Indiana program (Administrative Record No. IND-1665). By letter dated September 20, 1999, the Mine Safety and Health Administration (MSHA) responded to our request by stating that the proposed amendment does not conflict with MSHA regulations or policies (Administrative Record No. IND-1675).

Environmental Protection Agency (EPA)

Under 30 CFR 732.17(h)(11)(ii), we are required to get a written agreement from the EPA for those provisions of the program amendment that relate to air or water quality standards issued under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). None of the revisions that Indiana proposed to make in this amendment pertain to air or water quality standards. Therefore, we did not ask the EPA to agree on the amendment.

Under 30 CFR 732.17(h)(11)(i), we requested comments on the amendment from the EPA (Administrative Record No. IND-1665). The EPA did not respond to our request.

State Historical Preservation Officer (SHPO) and the Advisory Council on Historic Preservation (ACHP)

Under 30 CFR 732.17(h)(4), we are required to request comments from the SHPO and ACHP on amendments that may have an effect on historic properties. On August 9, 1999, we requested comments on Indiana's amendment (Administrative Record No. IND-1665), but neither responded to our request.

V. Director's Decision

Based on the above findings, we approve the amendment as sent to us by Indiana on August 2, 1999. We approve the rules that Indiana proposed with the provision that they be published in identical form to the rules submitted to and reviewed by OSM and the public.

To implement this decision, we are amending the Federal regulations at 30 CFR Part 914, which codify decisions concerning the Indiana program. We are making this final rule effective immediately to expedite the State program amendment process and to encourage Indiana to bring its program into conformity with the Federal standards. SMCRA requires consistency of State and Federal standards.

For reasons discussed in finding III.A., we are also amending 30 CFR Part 914 by removing the approval of an amendment that Indiana submitted on May 3, 1995.

VI. Procedural Determinations

Executive Order 12866

The Office of Management and Budget (OMB) exempts this rule from review under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12988

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 (Civil Justice Reform) and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on State regulatory programs and program amendments must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

This rule does not require an environmental impact statement since section 702(d) of SMCRA (30 U.S.C.

1292(d)) provides that agency decisions on State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon corresponding Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Therefore, this rule will ensure that existing requirements previously published by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the corresponding Federal regulations.

Unfunded Mandates

OSM has determined and certifies under the Unfunded Mandates Reform Act (2 U.S.C. 1502 *et seq.*) that this rule will not impose a cost of \$100 million or more in any given year on local, state, or tribal governments or private entities.

List of Subjects in 30 CFR Part 914

Intergovernmental relations, Surface mining, Underground mining.

Dated: November 4, 1999.

Charles E. Sandberg,

Acting Regional Director, Mid-Continent Regional Coordinating Center.

For the reasons set out in the preamble, 30 CFR Part 914 is amended as set forth below:

PART 914—INDIANA

1. The authority citation for Part 914 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. Section 914.15 is amended in the table by removing the entire entry having the date "May 3, 1995" in the "Original amendment submission date" column, and by adding a new entry in chronological order by "Date of final publication" to read as follows:

§ 914.15 Approval of Indiana regulatory program amendments.

* * * * *

| Original amendment submission date | Date of final publication | Citation/description |
|------------------------------------|---------------------------|------------------------------------|
| * | * | * |
| August 2, 1999 | November 22, 1999 .. | 310 IAC 12-5-64.1(c) and 128.1(c). |

BILLING CODE 4310-05-P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 920

[MD-044-FOR]

Maryland Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: OSM is approving proposed amendments to the Maryland regulatory program (Maryland program) under the

Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendments consist of revisions to the Maryland regulations regarding the design, construction and maintenance of haul roads. The amendments are intended to revise the Maryland program to be consistent with the corresponding Federal regulations.

EFFECTIVE DATE: November 22, 1999.

FOR FURTHER INFORMATION CONTACT: George Rieger, Program Manager, OSM, Appalachian Regional Coordinating Center, 3 Parkway Center, Pittsburgh PA 15220. Telephone: (412) 937-2153.

SUPPLEMENTARY INFORMATION:

- I. Background on the Maryland Program
- II. Submission of the Proposed Amendment
- III. Director's Findings
- IV. Summary and Disposition of Comments
- V. Director's Decision
- VI. Procedural Determinations

I. Background on the Maryland Program

On February 18, 1982, the Secretary of the Interior approved the Maryland program. You can find background information on the Maryland program, including the Secretary's findings, the disposition of comments, and the conditions of approval in the February 18, 1982, **Federal Register** (47 FR 7214). You can find subsequent actions concerning the conditions of approval and program amendments at 30 CFR 920.12, 920.15 and 920.16.

II. Submission of the Proposed Amendment

Maryland provided an informal amendment to OSM regarding the design, construction and maintenance of haul roads in a letter dated August 4, 1998. OSM completed its review of the
