

have an alcohol concentration of .04 or greater, plus the number of employees who refuse a random test required by part 654, divided by the total reported number of random alcohol tests conducted under part 654, plus the total number of refusals of random tests, required by part 654.)

FTA has received and analyzed the 1998 data from large and small transit employers. The "positive rate" for random drug tests was 1.07 percent and the "violation rate" for random alcohol tests was 0.22 percent; therefore, for 2000, transit employers will continue to be required to conduct random drug tests at a rate equivalent to at least 50 percent of the total number of their "safety-sensitive" employees for prohibited drugs. In 1999, the FTA lowered the random alcohol testing rate to 10 percent. Because the random alcohol violation rate was lower than .5 percent for two consecutive years (0.19 percent for 1997 and 0.22 percent for 1998), the random alcohol testing rate will remain at 10 percent for 2000.

FTA will be publishing, in December, a detailed report on the 1998 data collected from large and small employers. This report may be obtained from the Office of Safety and Security, Federal Transit Administration, 400 Seventh Street, SW, Room 9301, Washington, DC 20590, (202) 366-2896.

Date Issued: November 17, 1999.

Nuria I. Fernandez,
Acting Administrator.
