Associated with the plant will be approximately 18.6 miles of 230 kilovolt transmission line from the proposed plant to Opp, Alabama, and approximately 60 miles of natural gas pipeline from the proposed plant to Flomaton, Alabama. The natural gas pipeline to be constructed and owned by Southeast Alabama Gas District, will traverse Covington, Conecuh, and Escambia Counties, all of which are in Alabama. Alternative sites for the plant location were considered near Alabama Electric Cooperative's Lowman Plant at Leroy in Washington County, Alabama, and at a site in Damascus/Teddy area in Escambia County, Alabama. Three electric transmission line routes and three natural gas pipeline routes were considered.

Alabama Electric Cooperative prepared an environmental report for RUS, which describes the project and assesses its potential environmental impacts. RUS has conducted an independent evaluation of the environmental report, assisted in its completion, and accepted it as the agency's environmental assessment. No significant impacts are expected as a result of the construction and operation of the project.

The environmental assessment can be reviewed at the Andalusia Public Library, South Three Notch Street, Andalusia, Alabama; the White Smith Memorial Library, 213 College Ave., Jackson, Alabama; the Brewton Public Library, 206 Jackson Street, Brewton, Alabama; the headquarters of Alabama Electric Cooperative at the address provided above, or the headquarters of RUS, at the address provided above.

Questions and comments should be sent to RUS at the address provided. RUS will accept questions and comments on the environmental assessment for at least 35 days from the date of publication of this notice.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant Federal environmental laws and regulations and completion of

environmental review procedures as prescribed by RUS' Environmental Policies and Procedures, 7 CFR Part 1794.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census 2000 Partnership Program works to establish partnerships with state, local and tribal governments; private industry; local governments and community groups. The goal is to increase the awareness of the census and to increase response rates,

especially among historically undercounted populations.

The program has both a national and a regional focus. On the national level, the program is designed to implement promotional activities that may be sponsored and/or supported by national/umbrella government and nongovernmental organizations. In addition, the Census Bureau will partner with Fortune 500 companies to promote the importance of the census through the services and products they provide.

The regional partnership program reflects the Census Bureau's belief that the foundation for broad-based participation in the census must be built at the community level. Its primary purpose is to establish partnerships with state, local, and tribal governments; community organizations; businesses and the media.

The partnership program is a means to encourage mail response by those people who are not persuaded by direct mail, advertising or other methods. It complements these other methods by spreading information about the census, by assuring people that it is okay to participate and by providing help if needed.

For the evaluation, a contractor will be hired to conduct the data collection. Self-administered mail questionnaires will be sent to a sample of Census 2000 partners. The questionnaire will ask the partners about the activities performed for the Census 2000 Partnership Program, about the materials they received, and about their recommendations for improving the Program. The results will be used to evaluate the program, for 2010 planning purposes and to improve future census operations.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census in Schools Program provides teachers with interactive, engaging, and colorful lesson plans that meet national and state curriculum standards and that: help students understand the importance and benefits of the census; promote awareness and encourage greater participation in the census; and strive to increase the mailback response rate for the census.

Census in Schools materials have been made available to schools nationwide. This includes a Spring 1999 mailing to all teachers in the 40 percent of the nation's schools in the hardest to enumerate areas, and a Fall 1999 mailing to the principals and selected school officials in the remaining 60 percent of schools.

For the evaluation, a contractor will be hired to conduct the data collection. Self-administered mail questionnaires will be sent to a sample of teachers and principals in the United States. The questionnaire will ask the teachers and principals about their involvement in Census in Schools, about the materials they may have received, and about their recommendations for improving the Program. The results will be used to evaluate the program, for 2010 planning purposes and to improve future census operations.
