*Form Number(s):* ACE-1, ACE-1(L), ACE-2, ACE-2(L).

*Agency Approval Number:* 0607-0782.

*Burden:* 139,000 hours.

*Number of Respondents:* 59,000.

*Needs and Uses:* The Census Bureau plans the continuing information collection for the Annual Capital Expenditures Survey (ACES). The annual survey collects data on fixed assets and depreciation, sales and receipts, and capital expenditures for new and used structures and equipment. The ACES is the sole source of detailed comprehensive statistics on actual business spending by domestic, private, nonfarm businesses operating in the United States. Business spending data are used to evaluate the quality of estimates of gross domestic product, develop monetary policy, analyze business asset depreciation, and improve estimates of capital stock for productivity analysis. Industry analysts use these data for market analysis, economic forecasting, identifying business opportunities, product development, and business planning.

The major changes to the ACES are the elimination of our request for detailed types structures and types of equipment data from employer businesses, the elimination of research on new (birth) establishments, and the incorporation of the North American Industry Classification System (NAICS) into the survey.

*Affected Public:* Businesses or other for-profit organizations, Not-for-profit institutions.

### Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

*Agency:* U.S. Census Bureau.

*Title:* 2000 Survey of Program Dynamics.

*Form Number(s):* CAI Automated Instrument.

*Agency Approval Number:* 0607-0838.

*Type of Request:* Revision of a currently approved collection.

*Burden:* 25,150 hours.

*Number of Respondents:* 42,000.

*Avg. Hours Per Response:* 36 minutes per respondent, 10 minutes per reinterview.

*Needs and Uses:* The Census Bureau seeks OMB approval to conduct the 2000 Survey of Program Dynamics (SPD). The SPD provides the basis for an overall evaluation of how well welfare reforms are achieving the aims of the Administration and the Congress and meeting the needs of the American people. This survey simultaneously measures the important features of the full range of welfare programs, including programs that are being reformed and those that are unchanged, and the full range of other important social, economic, demographic, and family changes that will facilitate or limit the effectiveness of the reforms.

The SPD is a longitudinal study that follows a subset of the respondents from the 1992 and 1993 panels of the Survey of Income and Program Participation (SIPP). The SPD was first implemented in the spring of 1997 with a bridge survey that provided a link to baseline data for the period prior to the implementation of welfare reforms. The first full-scale SPD was conducted in 1998. Annual surveys will be conducted through 2002. The data gathered for the 10-year period (1992-2002) will aid in assessing short-to medium-term consequences of outcomes of the welfare legislation.

The majority of questions used in the 2000 SPD will remain the same as those from the 1999 SPD. However, some new questions for 2000 have been requested by policymakers. These include questions on children's residential history and changes to questions about public assistance and work training. Like the 1997 SPD Bridge survey, the 1998 SPD, and the 1999 SPD, the 2000 SPD uses a computer-assisted
