

appropriate for use by nonprofit private entities. Since 1994, CSAP has met this responsibility through the High Risk Populations Databank on programs for the prevention of substance abuse funded by direct CSAP grants. Because relatively few direct grants of this type have been issued in recent years, CSAP must expand its information collection to include voluntary submission of descriptions of effective substance abuse prevention conducted by state and local governments, nonprofit entities, and the private sector.

CSAP has developed a template to enable practitioners who have evidence that their program reduces risk factors or increases protective factors pertaining to substance abuse to nominate their own standardized program for the Registry. Each program that is nominated should have been standardized (including curriculum manuals, implementation manuals, videotapes, etc.), well implemented, and findings should derive from well designed research efforts. Program models nominated will be reviewed and rated by experts annually to be recommended to the field.

CSAP will promote selected models by providing funds to support development of program materials for dissemination, by connecting program developers with organizations able to help in the dissemination efforts, and by promoting model programs nationally through CSAP's State Incentive Grant recipients and regional Centers for Applied Prevention Technology. Annual burden estimates for the Registry are shown in the table below.
