Organophosphate Pesticides; Availability of Preliminary Risk Assessments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of documents that were developed as part of the EPA's process for making reregistration eligibility decisions for the organophosphate pesticides and for tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA). These documents are the preliminary human health risk assessments and related documents for mevinphos and phosalone. This notice also starts a 60-day public comment period for the preliminary risk assessments. Comments are to be limited to issues directly associated with the two organophosphates that have the risk assessments placed in the docket and should be limited to issues raised in those documents. By allowing access and opportunity for comment on the preliminary risk assessments, EPA is seeking to strengthen stakeholder involvement and help ensure our decisions under FQPA are transparent and based on the best available information. The tolerance reassessment process will ensure that the United States continues to have the safest and most abundant food supply. The Agency cautions that these risk assessments are preliminary assessments only and that further refinements of the risk assessments will be appropriate for some, if not all, of these organophosphate pesticides. These documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate

that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

DATES: Comments on these assessments, identified by the docket control number for the particular organophosphate pesticide of interest, must be received on or before March 13, 2000. Use the table in Unit I.C. of the "SUPPLEMENTARY INFORMATION" to determine the docket control number.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the "SUPPLEMENTARY INFORMATION." To ensure proper receipt by EPA, it is imperative that you identify the docket control number for the particular organophosphate pesticide of interest in the subject line on the first page of your response. Use the table in Unit I.C. to determine the docket control number.

II. Background

EPA is making available preliminary risk assessments that have been developed as part of EPA's process for making reregistration eligibility decisions for the organophosphate pesticides and for tolerance reassessments consistent with the FFDCAs, as amended by the FQPA. The Agency's preliminary risk assessments for two organophosphate pesticides are available in the individual organophosphate pesticide dockets: Mevinphos and phosalone.

Included in the individual organophosphate pesticide dockets are the Agency's preliminary risk assessments. As additional comments, reviews, and risk assessment modifications become available, these will also be docketed for the two organophosphate pesticides listed in this notice. The Agency cautions that these risk assessments are preliminary assessments only and that further refinements of the risk assessments will be appropriate for the two organophosphate pesticides. These documents reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.

As the preliminary risk assessments for the remaining organophosphate pesticides are completed and registrants are given a 30-day review period to identify possible computational or other clear errors in the risk assessments, these risk assessments and registrant responses will be placed in the individual organophosphate pesticide dockets. A notice of availability for subsequent assessments will appear in the **Federal Register**.

The Agency is providing an opportunity, through this notice, for interested parties to provide written

comments and input to the Agency on the preliminary risk assessments for the pesticides specified in this notice. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as percent crop treated information or submission of residue data from food processing studies, or could address the Agency's risk assessment methodologies and assumptions as applied to these specific chemicals. Comments should be limited to issues raised within the preliminary risk assessments and associated documents. EPA will provide other opportunities for public comment on other science issues associated with the organophosphate pesticide tolerance reassessment program. Failure to comment on any such issues as part of this opportunity will in no way prejudice or limit a commenter's opportunity to participate fully in later notice and comment processes. All comments should be submitted by March 13, 2000 at the address given under Unit I. Comments will become part of the Agency record for each individual organophosphate pesticide to which they pertain.

1,3-Dichloropropene; Proposed Determination to Terminate Special Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed Determination to Terminate Special Review.

SUMMARY: This Notice sets forth EPA's proposal to terminate the Special Review of 1,3-Dichloropropene (1,3-D). This proposal is based on Dow AgroSciences' changes to their product labels and EPA's determination that, with these label revisions, the benefits of 1,3-D use outweigh the risks. In making this determination, EPA considered several factors, including the risk reduction provided by numerous

mitigation measures that have been added to 1,3-D labels, the benefits of 1,3-D use and the risks and benefits of alternative soil fumigants, in particular the phase-out of methyl bromide production and imports by 2005. In December, 1998, EPA issued the Reregistration Eligibility Decision (RED) document for 1,3-D and has determined that all uses of 1,3-D are eligible for reregistration.

DATES: Comments, data and information relevant to the Agency's proposed decision, identified by the docket control number OPP-30000/51A, must be received on or before March 13, 2000.

ADDRESSES: Comments may be submitted by mail, electronically or in person. Please follow the detailed instructions for each method provided in the "SUPPLEMENTARY INFORMATION" section.

FOR FURTHER INFORMATION CONTACT: Phil Budig, Special Review and Reregistration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Telephone (703) 308-8029. E-mail address: budig.philip@epa.gov.
