

complaint issuance, I am willing to support the allegations relating to these two markets.

The proposed relief appears to be necessary and appropriate to address the complaint allegations in the refining, pipeline, and terminal markets. In my view, the Commission's staff and the merging parties have worked diligently and creatively to craft relief to remedy the competitive concerns in these markets. However, given the extraordinary complexity of the divestitures and other relief negotiated, I welcome public comments addressing whether the order would fulfill its remedial purpose without causing unintended adverse effects on competition or consumers. In particular, I would be interested in public comment on whether the merging parties should be required to divest the Exxon refinery in Benicia, California, and the Exxon retail gasoline stations in California to a single buyer. From a purely economic basis, there seems to be little logic in forcing the divestiture of the refinery and the retail stations to a single buyer.
