SUPPLEMENTARY INFORMATION:

Abstract

The Census Bureau must provide everyone living or staying in the United States on Census Day the opportunity to be counted in Census 2000. Many programs for non-English speaking respondents have been developed to assist in questionnaire response. These programs include questionnaires and Be Counted forms in Spanish, Korean, Chinese, Tagalog, and Vietnamese; Questionnaire Assistance Centers (QACs), which provide Language Assistance Guides (LAGs) in 49 additional languages; bilingual enumerators during follow-up operations, and Telephone Questionnaire Assistance (TQA) in

Spanish, Korean, Chinese, Tagalog, and Vietnamese. The Census Bureau anticipates that many of the non-English speaking respondents will use these programs. However, others may not use these programs for a variety of different reasons (*i.e.*, lack of awareness, fear, apathy, *etc.*).

The U.S. Census Bureau would like to better understand how non-English speaking respondents cope with the Census. To do this the Census Bureau is proposing to conduct a follow-up interview of long-form respondents that indicate they speak a language other than English at home. The types of information collected during the interview will address their awareness of the QACs, Be Counted forms, and LAGs; their ability to have completed the questionnaire on their own (*i.e.* did the non-English speaking respondent obtain help from a neighbor or someone else that speaks English?); and the language of the interview in Nonresponse Follow-up (NRFU).

II. Method of Collection

The reinterview will be conducted by telephone with specially trained bilingual interviewers. A telephone reinterview of approximately 5,000 cases will be conducted to result in approximately 1,000 completed cases for each of three languages. The reinterview will be done in Spanish, one language to be selected from the remaining four in which there are non-English questionnaires (Korean, Chinese, Tagalog, and Vietnamese), and one other language to be selected from those that have no non-English questionnaires. We plan to select the language groups for which the census process is expected to be most difficult based on linguistic isolation and other potential barriers to enumeration. The prevalence of the non-English language will also be a decision factor. The sample will be post-stratified based on the mode of response (*i.e.*, English form, non-English form, or enumerator form). We will conduct this operation in two waves with the first wave composed of those respondents returning a form through the mail, and the second wave composed of those respondents enumerated in NRFU. In the reinterview, we will attempt to determine: (1) If the respondents were aware of the QACs, LAGs, and Be Counted Forms, (2) Why the respondents did or did not use those services, and (3) For those responding in English yet indicating they do not speak English well, it is desired to know from whom they obtained assistance. The interviews will be performed May–July 2000, after the availability of the

appropriate data files from which the sample will be obtained.
