**NUCLEAR REGULATORY COMMISSION****NUREG-1717, Systematic Radiological Assessment of Exemptions for Source and Byproduct Materials**

The Nuclear Regulatory Commission has issued draft NUREG-1717, "Systematic Radiological Assessment of Exemptions for Source and Byproduct Materials." This report is an assessment of potential radiation doses associated with the current exemptions for

byproduct and source material in Title 10, of the *Code of Federal Regulations* (CFR). Doses were estimated for the normal life cycle of a particular product or material, covering distribution and transport, intended or expected routine use, and disposal using dose assessment methods consistent with the current requirements in 10 CFR Part 20. In addition, assessments of potential doses due to accidents and misuse were estimated. Also presented is an assessment of potential radiological impacts associated with selected products containing byproduct material that currently may only be used under a general license and may be potential candidates for exemption from licensing requirements.

Licensees, Agreement States and all other interested parties are encouraged to submit comments and relevant data on this report.
