

likelihood of continuation or recurrence of dumping. A deposit rate above a *de minimis* level continues in effect for exports of the subject merchandise by at least one Chinese manufacturer/exporter. Therefore, given that dumping has continued over the life of the order, the Department preliminarily determines that dumping is likely to continue if the orders were revoked.

Magnitude of the Margin

In the *Sunset Policy Bulletin*, the Department stated that it normally will provide to the Commission the margin that was determined in the final determination in the original investigation. Further, for companies not specifically investigated or for companies that did not begin shipping until after the order was issued, the Department normally will provide a margin based on the "all others" rate from the investigation. (See section II.B.1 of the *Sunset Policy Bulletin*.) Exceptions to this policy include the use of a more recently calculated margin, where appropriate, and consideration of duty absorption determinations. (See sections II.B.2 and 3 of the *Sunset Policy Bulletin*.) We note that, to date, the Department has not issued any duty absorption findings in either of these cases.

In their substantive responses, the domestic interested parties recommend that the Department deviate from its normal practice of forwarding margins from the original investigation and instead recommend using margins from more recent administrative reviews. In the case of bars/wedges, the domestic interested parties recommend forwarding to the Commission a margin of 36.76 percent for Fujian Machinery & Equipment Import & Export Corp. and 38.30 percent for Shandong Machinery Import & Export Corp., as calculated in the second administrative review; 31.76 percent for Tianjin Machinery Import & Export Corp. and Liaoning Machinery Import & Export Corp., as calculated in the original investigation; and 34 percent for Shandong Huarong General Group Corp., as calculated in the sixth administrative review. The domestic interested parties argue that since the imposition of the order, the dumping margins have increased for three companies as well as for the PRC as a whole. They argue further that because import volumes of bars/wedges have declined since the imposition of the order, the Department should use a more recently calculated rate for several PRC companies.

For hammers/sledges, the domestic interested parties recommend forwarding to the Commission the

margin of 45.42 percent calculated in the original investigation.

The respondents argue that the dumping margin likely to prevail if the order were revoked would be zero, but no higher than the average margin for the latest reviews. They base this argument on the fact that recent reviews conducted by the Department confirm that different surrogate steel values than were used in the original investigation significantly reduce the dumping margin (see July 30, 1999, substantive response of respondents at 3).

As noted in the *Sunset Regulations* and *Sunset Policy Bulletin*, the Department may provide to the Commission a more recently calculated margin for a particular company where dumping margins increased after the issuance of the order where that particular company increased dumping to maintain or increase market share. In this case, the domestic interested parties did not provide any company-specific argument or evidence that any Chinese companies have increased dumping in order to gain or maintain market share or increase import volumes. Moreover, while it is true that the dumping margins have increased for some Chinese companies, we have no company-specific information demonstrating that imports of the subject merchandise have not increased substantially over the life of the order. Since we have no company-specific information correlating an increase in exports for one company with an increase in the dumping margin for that particular company, we cannot conclude that use of more recently calculated margins is warranted in this case.

Additionally, the Department disagrees with the respondents' argument that a dumping margin of zero percent is likely to prevail were the order to be revoked. Specifically, as noted in the *Sunset Policy Bulletin*, the Department will consider forwarding to the Commission more recently calculated margins where dumping margins have declined over the life of the order and imports have remained steady or increased or where a company increases dumping in order to maintain or increase market share. The respondent's argument concerning changes in methodology (e.g., different surrogate steel values) does not fit either criteria. Therefore, consistent with the *Sunset Policy Bulletin*, the Department preliminarily finds that the margins calculated in the original investigation are probative of the behavior of Chinese producers/exporters if the order were to be revoked as they are the only margins which reflect their behavior absent the

discipline of the order. As such, the Department will report to the Commission the PRC-wide rates from the original investigation as contained in the Preliminary Results of Reviews section of this notice.

Preliminary Results of Reviews

As a result of these reviews, the Department preliminarily finds that revocation of the antidumping order would likely lead to continuation or recurrence of dumping at the margins listed below:

PRC-wide	Margin (percent)
Bars/Wedges	31.76
Hammers/Sledges	45.42

Any interested party may request a hearing within 30 days of publication of this notice in accordance with 19 CFR 351.310(c). Any hearing, if requested, will be held on March 15, 2000. Interested parties may submit case briefs no later than March 7, 2000, in accordance with 19 CFR 351.309(c)(1)(i). Rebuttal briefs, which must be limited to issues raised in the case briefs, may be filed not later than March 13, 2000. The Department will issue a notice of final results of this sunset review, which will include the results of its analysis of issues raised in any such comments, no later than June 26, 2000.

These five-year ("sunset") reviews and notices are in accordance with sections 751(c), 752, and 777(i)(1) of the Act.

Dated: January 18, 2000.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

Final Results of Five-Year ("Sunset") Review and Revocation of Antidumping Duty Order: Certain Compact Ductile Iron Waterworks Fittings and Glands From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On November 2, 1999, the Department of Commerce ("the

Department") initiated a sunset review of the antidumping duty order on certain compact ductile iron waterworks fittings and glands ("CDIW") from the People's Republic of China ("PRC"). Because no domestic party responded to the sunset review notice of initiation by the applicable deadline, the Department is revoking this order.

EFFECTIVE DATE: January 1, 2000.

FOR FURTHER INFORMATION CONTACT: Martha V. Douthit or Melissa G. Skinner, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-5050 or (202) 482-1560, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 7, 1993, the Department issued the antidumping duty order on CDIW from the PRC (58 FR 47117). Pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act"), the Department initiated a sunset review of this order by publishing notice of the initiation in the **Federal Register**, November 2, 1999 (64 FR 59160). In addition, as a courtesy to interested parties, the Department sent letters, via certified and registered mail, to each party listed on the Department's most current service list for this proceeding to inform them of the automatic initiation of the sunset review on this order.

No domestic interested party in the sunset review on this order responded to the notice of initiation by the November 17, 1999 deadline (see § 351.218(d)(1)(i) of *Procedures for Conducting Five-year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders*, 63 FR 13520 (March 20, 1998) ("*Sunset Regulations*").

Determination To Revoke

Pursuant to section 751(c)(3)(A) of the Act and § 351.218(d)(1)(iii)(B)(3) of the *Sunset Regulations*, if no domestic interested party responds to the notice of initiation, the Department shall issue a final determination, within 90 days after the initiation of the review, revoking the finding or order. Because no domestic interested party responded to the notice of initiation by the applicable deadline, November 17, 1999, we are revoking this antidumping duty order.

Effective Date of Revocation and Termination

Pursuant to section 751(c)(6)(A)(iv) of the Act, the Department will instruct the

United States Customs Service to terminate the suspension of liquidation of the merchandise subject to this order entered, or withdrawn from warehouse, on or after January 1, 2000. Entries of subject merchandise prior to the effective date of revocation will continue to be subject to suspension of liquidation and antidumping duty deposit requirements. The Department will complete any pending administrative reviews of this order and will conduct administrative reviews of subject merchandise entered prior to the effective date of revocation in response to appropriately filed requests for review.

Dated: January 14, 2000.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

Final Results of Full Sunset Review: Industrial Phosphoric Acid From Belgium

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of Full Sunset Review: Industrial Phosphoric Acid from Belgium.

SUMMARY: On September 23, 1999, the Department of Commerce ("the Department") published a notice of preliminary results of the full sunset review of the antidumping duty order on industrial phosphoric acid from Belgium (64 FR 51511) pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act"). We provided interested parties an opportunity to comment on our preliminary results. We received comments from the domestic interested parties. The Department did not receive a request for a public hearing, and, therefore, no hearing was held. As a result of this review, the Department finds that revocation of the antidumping duty order would likely lead to continuation or recurrence of dumping at the levels indicated in the Final Results of Review section of this notice.

EFFECTIVE DATE: January 24, 2000.

FOR FURTHER INFORMATION CONTACT: Darla D. Brown or Melissa G. Skinner, Office of Policy for Import Administration, International Trade

Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-3207 or (202) 482-1560, respectively.

SUPPLEMENTARY INFORMATION:

Statute and Regulations

This review was conducted pursuant to sections 751(c) and 752 of the Act. The Department's procedures for the conduct of sunset reviews are set forth in *Procedures for Conducting Five-year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders*, 63 FR 13516 (March 20, 1998) ("*Sunset Regulations*") and 19 CFR Part 351 (1998) in general. Guidance on methodological or analytical issues relevant to the Department's conduct of sunset reviews is set forth in the Department's Policy Bulletin 98:3—*Policies Regarding the Conduct of Five-year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders; Policy Bulletin*, 63 FR 18871 (April 16, 1998) ("*Sunset Policy Bulletin*").

Scope

The merchandise subject to this antidumping duty order is industrial phosphoric acid ("IPA") from Belgium. IPA is currently classifiable under item number 2809.20.00 of the Harmonized Tariff Schedule of the United States ("HTSUS"). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description remains dispositive.

Background

On September 23, 1999, the Department issued its *Preliminary Results of Full Sunset Review: Industrial Phosphoric Acid from Belgium* (64 FR 51511) ("*Preliminary Results*"). In our *Preliminary Results*, we found that revocation of the order would likely result in continuation or recurrence of dumping. In addition, we preliminarily determined that the magnitude of the margin of dumping likely to prevail were the order revoked was 14.67 percent for Societe Chimique Prayon-Rupel, S.A. ("Prayon") as well as for "all other" producers and/or exporters.

On November 8, 1999, within the deadline specified in 19 CFR 351.309(c)(1)(i), we received comments on behalf of Albright and Wilson Americas, Inc., FMC Corporation, and Solutia Inc. (collectively, the "domestic interested parties"). We have addressed the comments received below.

Comments

Comment 1: The domestic interested parties maintain that the Department
