

flow and land management. An average annual flow of 6 to 9 cfs must be maintained below the pump system, for habitat enhancement purposes.

Blackrock Waterfowl Habitat Area

This 1,500-acre area contains extensive waterfowl habitat. It will be enhanced through flow and land management to increase diversity.

Off-River Lakes and Ponds

Off-river lakes and ponds near the Blackrock Waterfowl Habitat Area will be enhanced and maintained for fisheries, shorebirds, and other birds through flow and land management.

Other Elements of the LORP

Land Management Plan

The preparation of a land management plan was specified in the MOU. It will address grazing on leases within LORP planning area. Management plans will be prepared for individual leases with a focus on enhancing native habitat diversity while allowing for sustainable grazing. The plans will focus on upland and riparian areas, irrigated pastures, and areas with sensitive species or habitats.

Recreation Plan

The LORP will also include a plan to guide access to, and recreational uses of, the LORP area, consistent with current LADWP management guidelines for public uses of the land. The focus of the plan is to ensure compatible human uses of the LORP lands.

Monitoring and Reporting Plan

The LORP will include a long-term plan for collecting and analyzing data on the progress of the LORP. These data will be used in an adaptive management program in which management actions will be modified, as necessary, to ensure successful implementation of the LORP.
