Under the licensed configuration, flows will travel through a concrete-lined water conduit, powerhouse, and tailrace tunnel, all located underground, between Lake Dardanelle and the new reservoir.

In the application, JDJ proposes to construct the powerhouse control room and service facilities at ground level and drill a vertical shaft to the position of the pumps/turbines, about 400 feet below grade. The powerhouse would be located about 2,500 feet closer to Lake Dardanelle than currently authorized. JDJ also proposes to slightly increase the capacity of the upper reservoir, allowing a maximum reservoir elevation of 1,010 feet instead of the authorized 1,007 feet.
