**The Secretary of Energy**

February 1, 2000.  
The Honorable John T. Conway  
Chairman, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004.

Dear Mr. Chairman: We are pleased to forward the Department of Energy implementation plan for addressing the issues raised in the Defense Nuclear Facilities Safety Board Recommendation 99–1, "Safe Storage of Pits at Pantex." Defense Nuclear Facilities Safety Board Recommendation 99–1 is consistent with the Department's focus to develop and implement improved pit storage programs.

The primary objective of this implementation plan is to expeditiously repackage pits into containers that will provide long-term, safe storage. The activities delineated in the plan are aimed at achieving that goal and provide for the development and implementation of a pit container surveillance program so the Department can monitor the AL–R8 Sealed Insert to ensure its continued quality and reliability.

Mr. Dave Beck, Deputy Assistant Secretary for Military Application and Stockpile Operations, Defense Programs, is the responsible manager for this implementation plan. He can be contacted at 202–586–4879.

Yours sincerely,

Bill Richardson,
