

increased environmental impact as a result of handling the BPRAs separately as low-level waste. The alternative to the proposed action would be to deny approval of the exemption and, therefore, require Duke to disassemble and store the BPRAs as low-level waste in separate containers.

Agencies and Persons Consulted

On January 24, 2000, the Division of Radiation Control, South Carolina Department of Health, was contacted about the EA for the proposed action and had no concerns.

Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements set forth in 10 CFR part 51. Based upon the foregoing EA, the Commission finds that the proposed action of granting an exemption from 10 CFR 72.212(a)(2) and 72.214 so that Duke may store spent nuclear fuel containing BPRAs in the NUHOMS®-24P storage system will not significantly impact the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to this exemption request, see the Duke exemption request dated August 30, 1999, which is docketed under 10 CFR part 72, Docket Nos. 72-4 and 72-40.

The exemption request is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, DC 20555.

Dated at Rockville, Maryland, this 2nd day of February 2000.

SUPPLEMENTARY INFORMATION: The General Electric Company has been engaged since 1955 in various activities involving nuclear energy at the Vallecitos Nuclear Center located near Pleasanton, California. One of the ongoing activities is research and development on the physical and chemical analysis of irradiated reactor fuel at the facilities Radioactive Materials Laboratory. GE possesses a Special Nuclear Materials License from the NRC that authorizes them to perform this work. The work requires periodic shipments of irradiated nuclear fuel into the facility from various sites throughout the United States. The Vallecitos site also houses three permanently shutdown reactors, and an operating research reactor, licensed by the NRC. In addition, the facility also fabricates radioactive sources used in medicine and industry under a license issued by the State of California.

The NRC previously held a public meeting on the Vallecitos facility on October 20, 1999, in Livermore, California. In order to ensure that the public has the necessary information about the facility, and to provide sufficient time for public discussion of this information, the NRC has scheduled an additional public meeting on the Vallecitos facility for February 24, 2000. The NRC staff will address the issues previously covered at the October 20, 1999, meeting, and also provide

additional information on issues that were raised by the public at the October 20, 1999, meeting. A detailed agenda for the meeting will be available at the meeting. Anticipated topics are the research and development activities involving the NRC Special Nuclear Materials license at the facility, related radioactive materials transportation activities, the status of the permanently shutdown reactors and the operating research reactor at the facility, and related NRC inspection activities. Extension: Rule 22d-1, SEC File No. 270-275, OMB Control No. 3235-0310.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is publishing for public comment the following summary of previously approved information collection requirements in Rule 22d-1 under the Investment Company Act of 1940 ("Investment Company Act").

Rule 22d-1 [17 CFR 270.22d-1] provides registered investment companies that issue redeemable securities ("funds") an exemption from section 22(d) of the Investment Company Act to the extent necessary to permit schedules variations in or elimination of the sales load on fund securities for particular classes of investors or transactions, provided certain conditions are met.
