

Title: New Locomotive Certification, Noise Compliance Regulations.

OMB Control Number: 2130-0527.

Abstract: On January 14, 1976, the Environmental Protection Agency (EPA) issued noise emission standards pursuant to the Noise Control Act of 1972. The standards, 40 CFR Part 201, establish limits on the noise emissions generated by railroad locomotives under

both stationary and moving conditions. Section 17 of the Noise Control Act also requires the Secretary of Transportation to enforce these regulations and promulgate separate regulations to ensure compliance with the same. On December 23, 1983, FRA published 49 CFR Part 210 to ensure compliance with the EPA standards. The certification and testing data ensure that locomotives

built after December 31, 1979 have passed prescribed decibel standards for noise emissions under EPA regulations.
