## II. Background

*Nutrition and Your Health: Dietary Guidelines for Americans*, published jointly by USDA and HHS, provides recommendations based on current scientific knowledge about how dietary intake may reduce risk for major chronic diseases and how a healthful diet may improve nutrition. The guidelines form the basis of Federal food, nutrition education, and information programs. First published in 1980, *Dietary Guidelines* were revised in 1985, 1990, and 1995. Public Law 101-445, Section 3 requires review and revision as necessary of the *Dietary Guidelines* every five years. This legislation also requires review by the Secretaries of USDA and HHS of all Federal dietary guidance-related publications for the general public. The fifth edition of the *Dietary Guidelines for Americans* is scheduled for release in 2000.

The 11 member Dietary Guidelines Advisory Committee was jointly appointed by the Secretaries of USDA and HHS in 1998, to review the fourth edition of the *Dietary Guidelines for Americans* to determine if changes are needed, and if so, to recommend suggestions for revision. The Committee, in the first meeting held in September 1998, determined that a revision was warranted. The Committee has submitted its report to the Secretaries of Departments of Agriculture and Health and Human Services. This report will serve as the basis for the fifth edition of *Nutrition and Your Health: Dietary Guidelines for Americans*.

The agency now gives notice of an extension of the initial scoping period for Forest Plan revision.
