SUPPLEMENTARY INFORMATION:

History

On Friday, December 3, 1999, the FAA proposed to amend 14 CFR part 71 to modify Class D airspace at Grand Forks AFB, ND (64 FR 67810). The proposal was to amend the effective hours to coincide with the ATCT hours of operation for Grand Forks AFB. Controlled airspace extending upward from the surface is needed to contain Instrument Flight Rules (IFR) operations during portions of the terminal operation and while transiting between the enroute and terminal environments. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 modifies Class D airspace at Grand Forks AFB, ND, by amending the effective hours to coincide with the ATCT hours of operation for Grand Forks AFB. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
