IV. What Action is EPA Taking in this Notice?

EPA is making available for public viewing the revised risk assessments and related documents for two organophosphate pesticides, acephate

and methamidophos. These documents have been developed as part of the pilot public participation process that EPA and USDA are now using for involving the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual organophosphate pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The pilot public participation process was developed as part of the EPA-USDA Tolerance Reassessment Advisory Committee (TRAC), which was established in April 1998, as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation process is to find a more effective way for the public to participate at critical junctures in the Agency's development of organophosphate pesticide risk assessments and risk management decisions. EPA and USDA began implementing this pilot process in August 1998, to increase transparency and opportunities for stakeholder consultation. The documents being released to the public through this notice provide information on the revisions that were made to the acephate and methamidophos preliminary risk assessments, which were released to the public, January 8, 1999 (64 FR 1199) (FRL-6055-9), through a notice in the **Federal Register**.

In addition, this notice starts a 60-day public participation period during which the public is encouraged to submit risk management proposals or otherwise comment on risk managements for acephate and methamidophos. The Agency is providing an opportunity, through this notice, for interested parties to provide written risk management proposals or ideas to the Agency on the chemical specified in this notice. Such comments and proposals could address ideas about how to manage dietary, occupational, or ecological risks on specific acephate and methamidophos use sites or crops across the United States or in a particular geographic region of the country. To address dietary risk, for example, commenters may choose to discuss the feasibility of lower application rates, increasing the time interval between application and harvest ("pre-harvest intervals"), modifications in use, or suggest alternative measures to reduce residues contributing to dietary exposure. For occupational risks, commenters may suggest personal protective equipment or technologies to reduce exposure to

workers and pesticide handlers. For ecological risks, commenters may suggest ways to reduce environmental exposure, e.g., exposure to birds, fish, mammals, and other non-target organisms. EPA will provide other opportunities for public participation and comment on issues associated with the organophosphate pesticide tolerance reassessment program. Failure to participate or comment as part of this opportunity will in no way prejudice or limit a commenter's opportunity to participate fully in later notice and comment processes. All comments and proposals must be received by EPA on or before April 24, 2000, at the addresses given under the "ADDRESSES" section. Comments and proposals will become part of the Agency's official record for the organophosphate pesticides specified in this notice.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: On November 4, 1999, the State of California submitted a complete application to administer and enforce training and certification requirements, training program accreditation requirements, and work practice standards for lead-based paint activities in target housing and child-occupied facilities under section 402 of the Toxic Substances Control Act (TSCA) for EPA approval. This notice announces the receipt of the State of California's complete application, provides a 45-day public comment period, and an

opportunity to request a public hearing on the application. In its initial submittal of its application, dated September 28, 1998, the State of California certified that its program meets the requirements for approval of a State program under section 404 of TSCA. Therefore, pursuant to section 404, the program is deemed authorized as of September 28, 1998. If EPA subsequently finds that the program does not meet all the requirements for approval of a State program, EPA will work with the State to correct any deficiencies in order to approve the program. If the deficiencies are not corrected, a notice of disapproval will be issued in the **Federal Register** and a Federal program will be implemented in the State.
