A new precautionary area southwest of Delta Port will accommodate vessels departing Delta Port and the Tsawwassen Ferry Terminal as they get up to maneuvering speed before and while entering the TSS.

A new precautionary area around East Point will provide logical connection to three converging traffic lanes. It will also highlight the need for potential crossing traffic in this area to exercise caution and will provide tankers departing Cherry Point bound for Haro Strait with a predictable and safe location to enter the traffic scheme. **Recommendation:** That we implement all actions presented as Issues #11a and 11b.

**Future Actions**

We appreciate the comments we received concerning the PARS. Upon receiving your comments concerning this notice of preliminary study results, we will analyze them, and publish a notice of study results in the **Federal Register.** Any recommended changes to the Code of Federal Regulations will require a notice of proposed rulemaking (NPRM) published in the **Federal Register.** In addition, any changes to the vessel routing system, i.e., TSS, ATBA, and precautionary areas, will require submission to and approval of the International Maritime Organization.

**Approval and Promulgation of Implementation Plan; Indiana**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is proposing to approve revisions to particulate matter (PM) emissions regulations for Indianapolis Power and Light Company (IPL) in Marion County, Indiana, which were submitted by the Indiana Department of Environmental Management (IDEM) on November 22, 1999, as amendments to its SIP. The revisions apply to 3 IPL generating stations located in Indianapolis: Perry K, Perry W (demolished), and E.W. Stout. The revisions include relaxation of some PM limits, tightening of other limits, and the elimination of limits for several boilers which are no longer operating. The revisions also include the combination of annual emissions limits for several boilers and correction of a typographical error in one limit. This SIP revision results in an overall decrease in allowed PM emissions of 52.54 tons per year. An air quality modeling analysis conducted by the IDEM shows that the maximum daily and annual impacts of this SIP revision are well below established significance levels. Therefore, this SIP revision will not have an adverse effect on PM air quality.

**DATES:** EPA must receive written comments on this proposed rule by March 24, 2000.

**ADDRESSES:** You should mail written comments to: J. Elmer Bortzer, Chief, Regulation Development Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604.
