**AGENCY:** Environmental Protection Agency.

**ACTION:** Proposed rule.

**SUMMARY:** The Safe Drinking Water Act (SDWA), as amended in 1996, requires the U.S. Environmental Protection Agency to establish criteria for a program to monitor unregulated contaminants and to publish a list of contaminants to be monitored. In fulfillment of this requirement, EPA published the Revisions to the Unregulated Contaminant Monitoring Rule (UCMR) on September 17, 1999 (64 FR 50556) which included a list of contaminants to be monitored.

Both perchlorate and acetochlor were placed on the UCMR (1999) List 1, Assessment Monitoring, with the method listed as "Reserved" pending imminent conclusion of EPA refinement and review of the analytical methods for perchlorate and acetochlor. In this issue of the **Federal Register**, EPA is revising the UCMR by promulgating analytical methods for the measurement of perchlorate and acetochlor in drinking water as a direct final rule without prior proposal because EPA views this as a noncontroversial revision and anticipates no adverse comment. EPA has addressed the regulatory text and explained the authority, purpose, and rationale for the rule and the Agency's compliance with the laws and executive orders affecting rulemaking in the preamble to the direct final rule. If EPA receives no adverse comment, it will not take further action on this proposed

rule. If EPA receives adverse comment, the Agency will withdraw the direct final rule and it will not take effect. EPA would then address all public comments in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

**DATES:** Comments must be received in writing by April 3, 2000.
