Summary: EPA expressed concern with the High Desert Power Project (HDPP) due to the need to characterize the trichloroethane (TCE) groundwater plume under the power plant site prior to the plant's design and construction and potential UIC permit requirements. EPA urged selection of the power plant without the 32-mile natural gas pipeline, given the potential adverse effects of the pipeline on special status species and the expectation of sufficient natural gas from the 3.5 mile pipeline.
