Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Health Resources and Services Administration (HRSA) publishes abstracts of information collection requests under review by the Office of Management and Budget, in compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). To request a copy of the clearance requests submitted to OMB for review, call the HRSA Reports Clearance Office on (301)-443-1129.

The following request has been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1995:

Proposed Project: Pilot Study of African American Women on Health Care Attitudes and Behaviors—NEW

The Office of Minority and Women's Health (OMWH) in the Bureau of

Primary Health Care (BPHC), Health Resources and Services Administration (HRSA) awarded funding for a pilot study which will develop information about the design of a sample appropriate to determine the health status, behaviors, and health service perceptions of African American women who are: (1) College educated, and (2) low income, non-college educated. The pilot study will be used to evaluate the interview instrument and to discover the practical issues and feasibility of sampling low income African American women from the databases of community health centers in three test locations. The goal is to assess the instrument, the sample sources, the procedures, and the response rates and to determine the extent to which data can be collected in a systematic and comprehensive manner. The pilot study is the first step in a much larger nationwide effort to build a significant data set containing detailed information on health status, health indicators, and health behaviors of African American women.

The burden estimate for the pilot study is as follows:

Respondent	Number of respondents	Responses per respondent	Total responses	Hours per response	Total hour burden
College educated	60	1	60	30 minutes	30
Non-college educated	180	1	180	30 minutes	90
Total	240	240	120

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Wendy A. Taylor, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, D.C. 20503.

Dated: February 28, 2000.

Jane Harrison,
Director, Division of Policy Review and Coordination.

National Institutes of Health

Proposed Collection; Comment Request; Request for Generic Clearance To Collect Customer Survey Data Pertaining to NIH Internet Sites

SUMMARY: In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

Proposed Collection

Title: Request for Generic Clearance to Collect Customer Survey Data Pertaining to NIH Internet Sites. *Type of Information Collection Request:* NEW. *Need and Use of Information Collection:* Executive Order 12862 directs agencies that provide significant services directly

to the public to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services. With this submission, the NIH, Office of Communications and Public Liaison, seeks to obtain OMB's generic approval to conduct customer satisfaction surveys. Since the late 1980's, the NIH has seized the opportunity to disseminate information and materials via the Internet. Today, rapid technological changes of the WWW warrant on-going constituent and resource analysis. With survey information, the NIH is enabled to serve, and respond to, the ever-changing demand by the public. The "public" includes individuals (such as patients, educators, students, etc.) and interested communities (such as national or local organizations/institutions) and business. Survey information will augment current Web content, delivery, and design research which is used to understand the Web user, and more specifically, the NIH user community. Primary objectives are to (1) classify
