Pursuant to section 3506(c)(2)(A) of the Paperwork Reduction Act (PRA), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burdens of the proposed collections of information.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

IV. What Information Collection Activity or ICR Does this Action Apply to?

EPA is seeking comments on the following ICR:

Title: Pesticide Product Registration Maintenance Fee.

ICR numbers: EPA ICR No. 1214.05, OMB No. 2070-0100.

ICR status: This a renewal of an existing ICR that is currently approved by OMB and is due to expire September 30, 2000. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information that is subject to the approval under the PRA, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices, and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

Abstract: This information collection program provides a practical means of communication between the registrants and the Agency to collect the pesticide product registration maintenance fees as required by section 4(i)(5) of FIFRA as amended. Each affected firm is required to complete a filing form and submit their fee payment by January 15 of each year. Respondents complete and submit EPA Form 8570-30 indicating the respondent's liability for the registration

maintenance fee. The Agency provides registrants a list of the registered products currently registered with the Agency. Registrants are provided the opportunity to review the list, determine its accuracy, and remit payment of the maintenance fee. The list of products has space identified for marking those products to be supported and those products that are to be canceled. The registrants are also instructed to identify any products on the list which they believe to be transferred to another company, and to add to the list any products which the company believes to be registered that are not on the Agency list. The failure to pay the required fee for a product will result in cancellation of that product. Since 1994, the number of registrants to which these forms are sent has remained fairly stable at around 2,000. No changes in the substance or in the method of collection is proposed in this ICR renewal request.

V. What are EPA's Burden and Cost Estimates for this ICR?

Under the PRA, “burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. For this collection it includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden is estimated at 0.94 per collection. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities: Pesticide registrants.

Estimated total number of potential respondents: 1,977.

Frequency of response: Annually, by January 15.

Estimated total/average number of responses for each respondent: Dependent upon number of registrations held.

Estimated total annual burden hours: 1,858 hours.

Estimated total annual burden costs:
\$177, 870.69.

VI. Are There Changes in the Estimates from the Last Approval?

Few changes have occurred since the last approval. Most firms have filed the form in the past 6 years and are familiar with the annual requirement, and with the form itself. Most of the companies hold 10 or fewer products, and find that it takes only a few minutes to complete the form. The Agency believes that access and use of a toll free help line has paid great dividends in assisting respondents with questions. Therefore, the burden has remained relatively unchanged from the most recent renewal.

VII. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under "FOR FURTHER INFORMATION CONTACT."
